*Christian Character Formation* Gifford A. Grobien, 2019-05-16 *Christian Character Formation* investigates worship and formation in view of Christian anthropology particularly union with Christ Traditions which value justification by faith wrestle to some degree with how to describe and encourage ethical formation when salvation and righteousness are presented as gracious and complete The dialectic of law and gospel has suggested to some that forgiveness and the advocacy of ethical norms contend with each other By viewing justification and formation in light of Christ's righteousness which is both imputed and imparted it is more readily seen that forgiveness and ethics complement each other In justification God converts a person by which he grants new character Traditional Lutheran anthropology says that this regeneration grants a new nature in mystical union with Jesus Christ By exploring the Finnish Luther School led by Tuomo Mannermaa Gifford A Grobien explains how union with Christ imparts righteousness and the corresponding new character to the believer Furthermore as means of grace the Word and sacraments are the means of establishing union with Christ and nurturing new character Considering Oswald Bayer's suffering the word of Christ Louis Marie Chauvet's symbolic order and Bernd Wannenwetsch's understanding of worship as Christianity's unique form of life Grobien argues that worship practices are the foundational and determinative context in which grace is offered and in which the distinctively Christian ethos supports

virtues consistent with Christian character This understanding is also coordinated with Stanley Hauerwas's narrative ethics and Luther's teaching of virtue and good works in view of the Ten Commandments *Abortion* Alireza Bagheri, 2021-04-13 Rather than providing a global solution to the problem of abortion to abort or not to abort this volume sheds light on different but equally critical dimensions of abortion in global debate and practice The aim is to elaborate on different value systems and policies in order to empower individuals to make well informed decisions about abortion guided by moral reflection The twenty one chapters of this volume are written by distinguished scholars in each of the religious and non religious schools of thought offering an exhaustive survey of the differing religious and legal views on abortion within the international community The contributors present authoritative discussions in favor of or against abortion based on their perspectives and practices As a result the content of this book provides a foundational platform for better understanding meaningful dialogue and tolerance on a social issue which has divided individuals philosophers theologians policy makers and legislators within and across societies for centuries

**Religious Methods and Resources in Bioethics** P.F. Camenisch, 2013-03-09 A volume on religious theological methods in biomedical ethics inevitably of whether the methodological dimension can be distinguished from the various other things that go on in ethical discourse It is difficult to answer this question definitively since many elements in moral conversation can be interpreted in different ways Barbara Hilkert Andolsen illustrates this issue in this volume when she defines one of her crucial categories gender justice as being both procedural and substantive normative This difficulty of finally separating the methodological from the normative arises in many areas of contemporary ethical writing both feminist and otherwise Nevertheless it seems that in many cases we can separate out the methodological issues with considerable precision Albert Jonsen and James Childress achieve just such a sharp focus in their essays This does not mean that a careful

dissecting of their papers would not reveal normative elements lurking about their methodological points It is simply to say that the issues they analyze and the positions they take are at least prima facie overwhelmingly method ological They are much more about how we think about ethical matters than they are about what we think about them Understanding World Christianity Paul Kollman,Cynthia Toms Smedley,2018-09-01 Each volume of the Understanding World Christianity series analyzes the state of Christianity from six different angles The focus is always Christianity but it is approached in an interdisciplinary manner chronological denominational sociopolitical geographical biographical and theological Short engaging chapters help readers understand the complexity of Christianity in the region and broaden their understanding of the region itself Readers will understand the interplay of Christianity and culture and will see how geography borders economics and other factors influence Christian faith In this exciting volume Paul Kollman and Cynthia Toms Smedley offer an introduction to Eastern African Christianity that has been desperately needed by scholars students and interested readers alike Rich in experience and knowledge Kollman and Toms Smedley introduce readers to the vibrancy of Eastern African Christianity like no other authors have done before *COMPLETE THEOLOGY COURSE* Marcel Souza, Complete Theology Course is a comprehensive work that delves into the complexities and depths of theological study guiding the reader through an enriching intellectual journey This book provides an overview of major theological traditions exploring crucial themes that permeate the history of religion and philosophy From the foundations of theology to contemporary issues each chapter is skillfully crafted to provide a solid and balanced understanding Readers will find in depth discussions on the nature of God theodicy Christology pneumatology and other crucial topics Additionally the book critically and reflectively addresses the intersections between theology ethics science and society Written by experts in the field the Complete Theology Course not only presents essential theological information but also stimulates critical thinking and personal reflection With an accessible approach the work is intended for students academics and readers interested in deepening their understanding of theological issues that have shaped and continue to shape human thought This book is a valuable resource for those seeking to explore the mysteries of faith the evolution of doctrines and interreligious dialogue providing a comprehensive and contemporary insight into the vast field of theology Allocating Scarce Medical Resources H. Tristram EngelhardtJr.,Mark J. Cherry,2002-05-20 Roman Catholic moral theology is the point of departure for this multifaceted exploration of the challenge of allocating scarce medical resources The volume begins its exploration of discerning moral limits to modern high technology medicine with a consensus statement born of the conversations among its contributors The seventeen essays use the example of critical care because it offers one of the few areas in medicine where there are good clinical predictive measures regarding the likelihood of survival As a result the health care industry can with increasing accuracy predict the probability of saving lives and at what cost Because critical care involves hard choices in the face of finitude it invites profound questions about the meaning of life the nature of a good death and distributive justice For those who identify the

prize of human life as immortality the question arises as to how much effort should be invested in marginally postponing death In a secular culture that presumes that individuals live only once and briefly there is an often unacknowledged moral imperative to employ any means necessary to postpone death The conflict between the free choice of individuals and various aspirations to equality compounds the challenge of controlling medical costs while also offering high tech care to those who want its possible benefits It forces society to confront anew notions of ordinary versus extraordinary and proportionate versus disproportionate treatment in a highly technologically structured social context This cluster of discussions is enriched by five essays from Jewish Orthodox Christian and Protestant perspectives Written by premier scholars from the United States and abroad these essays will be valuable reading for students and scholars of bioethics and Christian moral theology

Emanuel, 2018 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation *Rationing and Resource Allocation in Healthcare: Essential Readings* provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics
