Healthy Schools The Hidden Component Of Teaching And Learning:

Healthy Schools Phyllis A. Gimbel, Lenesa Leana, 2013 Creating conditions for better teaching and learning to occur has become an important responsibility for today's school leaders. Principals must attend to building and sustaining healthy school cultures. The authors take the reader on a journey through several different situations that occur at the elementary, middle, and high school levels and focus on a different and challenging aspect of educational leadership every time. The reader can read and analyze different scenarios and decide whether or not the outcome was the best for all stakeholders involved. Not only do all of the vignettes offer beneficial advice to educational leaders of all levels and experience but they also provide research that demonstrates how and why each educational leader does what he or she does in each situation and how those choices affect everyone involved. We believe that these vignettes support the most important quality of school leadership: Promoting the success of every student by advocating nurturing and sustaining a school culture and instructional program conducive to student learning and staff professional growth. Leadership through Mentoring Phyllis A. Gimbel, Peter Gow, 2021-07-10 Leadership Through Mentoring: The Key to Improving the Principals' Confidence and Skill lays out the case for the development of robust mentorship programs to support new school leaders. With principal turnover at an all-time high, it is urgent that schools and districts find ways to help newly appointed leaders grow into effective supervisors, managers, and strategic thinkers who can also find personal and professional satisfaction in their careers. Using examples from several established and successful state programs, Leadership Through Mentoring shows how new school leaders' effectiveness, vision, and engagement can be grown through intentionally designed and executed programs that offer supportive guidance and wise counsel from experienced leaders. Thoughtfully created and appropriately resourced, such programs can pave the way to longer and more successful principal tenures, which research shows lead directly to significant improvements in schools' cultures, educational efficacy, and teacher and student performance. This is a book for leaders and
