Chemistry in Context, 8e

American Chemical Society

Publishing: 1/10/2014

ISBN: 978-0-07-352297-5

Following in the tradition of the first seven editions, the goal of this successful, issues-based textbook, *Chemistry in Context*, is to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and significant issues facing science and the world. The non-traditional approach of *Chemistry in Context* reflects today's technological issues and the chemistry principles within them. Global warming, alternate fuels, nutrition, and genetic engineering are examples of issues that are covered in *Chemistry in Context*. www.mhhe.com/cic8e

Introduction to Chemistry, 3e

Rich Bauer, James Birk, and
Patricia Marks

Published: 1/05/2012

ISBN: 978-0-07-340267-3

Introduction to Chemistry, 3e by Bauer/Birk/Marks offers today's student a fresh perspective to the introduction of chemistry. This new textbook offers a conceptual approach to chemistry by starting first with macroscopic phenomena, and then presenting the underlying microscopic detail. Each chapter opens with a real-life scenario that helps students connect abstract chemical concepts to their own lives. The math found in *Introduction to Chemistry, 3e* is introduced on a need-to-know basis, with "Math Toolboxes" in select chapters to help support the math skills required in that chapter. www.mhhe.com/bauer3

General Chemistry

Chemistry: Atoms First, 2e

Julia Burdge and Jason Overby

Publishing: 1/10/2014

ISBN: 978-0-07-351118-4

The atoms first approach provides a consistent and logical method for teaching general chemistry. This approach starts with the fundamental building block of matter, the atom, and uses it as the stepping stone to understanding more complex chemistry topics. Once mastery of the nature of atoms and electrons is achieved, the formation and properties of compounds are developed. Only after the study of matter and the atom will students have sufficient background to fully engage in topics such as stoichiometry, kinetics, equilibrium, and thermodynamics. Thus, the *Atoms First* method empowers instructors to present the most complete and compelling story of general chemistry. Julia Burdge is renowned for setting chemistry in interesting, relevant context; and for her engaging, conversational writing style—presenting chemistry in a way students can appreciate and understand; while satisfying instructors' requirements for rigor, accuracy, and comprehensive coverage. Jason Overby teaches general chemistry using an atoms-first approach, bringing a unique perspective and years of experience to the development of this new project. Far from a simple re-ordering of topics, this is a book that will truly meet the needs of the growing atoms-first market. Together, these authors have developed a product with the same engaging writing style, modern and descriptive artwork, sound problem-solving approach and wide range of end-of-chapter problems that customers are accustomed to with the Burdge/Chemistry product. Jason

Overby's involvement with this project was crucial as he has been teaching with this approach for over four years which allowed Julia and Jason to create a product that fits the need for this growing market. www.mhhe.com/burdgeoverby

Chemistry: The Molecular Nature of Matter and Change, 7e

Martin Silberberg and Patricia Amateis

Publishing: 1/10/2014

ISBN: 978-0-07-351117-7

Chemistry: The Molecular Nature of Matter and Change by Martin Silberberg has been recognized in the general chemistry market as an unparalleled classic. The seventh edition keeps pace with the evolution of student learning by adding and significantly enhancing sample problems, a key resource of students. The text still contains unprecedented macroscopic-to-microscopic molecular illustrations, consistent step-by-step worked exercises in every chapter, and an extensive range of end-of-chapter problems, which provide engaging applications covering a wide variety of interests, including engineering, medicine, materials, and environmental studies. Changes have been made to the text and applications throughout to make them more succinct, to the artwork to make it more teachable and modern, and to the design to make it more simplistic and open. www.mhhe.com/silberberg
