Averett, Laura M. Argys, Saul D. Hoffman, 2018-05-15 The transformation of women's lives over the past century is among the most significant and far reaching of social and economic phenomena affecting not only women but also their partners children and indeed nearly every person on the planet In developed and developing countries alike women are acquiring more education marrying later having fewer children and spending a far greater amount of their adult lives in the labor force Yet because women remain the primary caregivers of children issues such as work life balance and the glass ceiling have given rise to critical policy discussions in the developed world In developing countries many women lack access to reproductive technology and are often relegated to jobs in the informal sector where pay is variable and job security is weak Considerable occupational segregation and stubborn gender pay gaps persist around the world The Oxford Handbook of Women and the Economy is the first comprehensive collection of scholarly essays to address these issues using the powerful framework of economics Each chapter written by an acknowledged expert or team of experts reviews the key trends surveys the relevant economic theory and summarizes and critiques the empirical research literature By providing a clear eyed view of what we know what we do not know and what the critical unanswered questions are this Handbook provides an invaluable and wide ranging examination of the many changes that have occurred in women's economic lives *Boosting Productivity in Sub-Saharan Africa* Cesar Calderon, 2021-12-17 The rising concentration of extreme poverty in Sub Saharan Africa over the past quarter century can be attributed to the fact that economic growth has been slow productivity levels are still low and growth has not been inclusive enough to put a big dent in poverty What explains the dismal performance on labor productivity in Sub Saharan Africa compared with the rest of the developing world This report argues that first physical capital is scarce and economic activities in the region have low capital intensity relative to other regions Second although human capital levels were relatively similar in Sub Saharan Africa relative to a group of East Asian Pacific countries in 1960 insufficient investment and poor outcomes led not only to relatively lower levels but also to low quality of human capital Finally scarce resources compounded by the inefficiencies in their allocation across productive units with different levels of productivity translated into low aggregate labor productivity Sub Saharan Africa needs policies to boost productivity across all sectors of economic activity especially in those sectors in which most poor people make their living The region needs policies that improve productivity in the agriculture sector foster rural development and create jobs for youth who are joining the labor force **OECD Reviews of Innovation Policy: Kazakhstan 2017** OECD, 2017-07-10 This report provides an independent and comparative assessment of the overall performance of Kazakhstan's innovation system since independence with recommendations on improving

performance drawing on the experience of other OECD countries in innovation processes systems and policies While **A Mandate to Grow** Eduardo A. Cavallo,Andrew Powell,2018-03-15 The 2018 Macroeconomic Report A Mandate to Grow revisits the growth debate that has been raging in the region for the past half century Viewing the debate from this long term perspective allows for a focus on the structural factors that have prevented Latin America and the Caribbean from reaching the growth potential required to keep pace with faster growing regions and to fulfill the aspirations of its population
