Bilingualism and Identity Mercedes Niño-Murcia, Jason Rothman, 2008 Sociolinguists have been pursuing connections between language and identity for several decades But how are language and identity related in bilingualism and multilingualism Mobilizing the most current methodology this collection presents new research on language identity and bilingualism in three regions where Spanish coexists with other languages The cases are Spanish English contact in the United States Spanish indigenous language contact in Latin America and Spanish regional language contact in Spain This is the first comparativist book to examine language and identity construction among bi or multilingual speakers while keeping one of the languages constant The sociolinguistic standing of Spanish varies among the three regions depending whether or not it is a language of prestige Comparisons therefore afford a strong constructivist perspective on how linguistic ideologies affect bi multilingual identity formation Language, Ethnic Identity and the State William Safran, J.A. Laponce, 2014-02-04 This new study powerfully asserts the pivotal importance of the interplay between language and ethnicity which is often underestimated as a component for political stability These leading scholars present five key case studies of South Africa Algeria Canada Latvia and Senegal All five countries are multilingual nations where language has been a central political issue that has challenged their unity and stability These studies are underpinned by two general comparative and theoretical
