We ve all been there faced with a major decision yet overwhelmed by the very data that is supposed to help us It s an all too common struggle in the digital age when Google searches produce a million results in a split second and software programs provide analysis faster than we could ever hope to read it Adapting the geopolitical and historical lessons gleaned from over two decades in government intelligence Philip Mudd an ex National Security Council staff member and former senior executive at the FBI and the CIA finally gives us the definitive guidebook for how to approach complex decisions today Filled with logical yet counterintuitive answers to ordinary and extraordinary problems whether it be buying a new home or pivoting a failing business model Mudd s HEAD High Efficiency Analytic Decision making methodology provides readers with a battle tested set of guiding principles that promise to bring order to even the most chaotic problems all in five practical steps What s the question Analysts often believe that questions are self evident but focusing on better questions up front always yields better answers later What are your drivers The human mind has a hard time juggling information so analysts

need a system to break down complex questions into different characteristics or drivers How will you measure performance Once the question has been solidified and the drivers determined an analyst must decide what metrics they will use to understand how a problem and their solution to it is evolving over time What about the data Rather than looking at each bit of information on its own and up front an analyst can only overcome data overload by plugging data into their driver categories and excising anything that doesn't fit What are we missing Complex analysis isn't easy so it is imperative to assume that the process is flawed while also knowing how to check for possible gaps and errors such as availability bias halo effects and intuitive versus analytic methodologies Drawing deeply from his own harrowing experiences and mistakes in the line of duty Mudd has spent years refining and teaching his methodology to Fortune 500 companies and government organizations Now in the best selling tradition of Charles Duhigg's *The Power of Habit* and Oren Klaff's *Pitch Anything* Philip Mudd's *The HEAD Game* can change the way you both live and work
