Rebooting the American Dream Thom Hartmann, 2011-08-01 If we are going to live in a democracy we need to have a healthy middle class tells us what needs to be done to reclaim what it is to be American Eric Utne founder Utne Reader America does not need an upgrade For years the Right has been tampering with one of the best political operating systems ever designed The result has been economic and environmental disaster In this hard hitting book nationally syndicated radio and television host and bestselling author Thom Hartmann outlines eleven common sense proposals deeply rooted in America's history that will once again make America strong and Americans not corporations and billionaires prosperous Some of these ideas will be controversial to both the Left and the Right but the litmus test for each is not political correctness but whether or not it serves to revitalize this country we all love and make life better for its citizens

Living with ADHD Thom Hartmann, 2020-05-05 A practical system for those with ADHD to take back their personal power and embrace their unique talents for success in the modern world Explains how those with ADHD grow up wounded by the negative labels and attitudes surrounding them and their diagnosis Shares simple and fast acting techniques from neurolinguistic programming NLP to recalibrate painful memories into valuable learning experiences re pattern learned behaviors and negative habits and discover personal motivation Reveals how the novelty seeking behaviors of those with ADHD are valuable assets to society and should be embraced rather than suppressed One of the first rules of child rearing is condemn the behavior not the child Yet this commonsense rule doesn't seem to apply in the case of attention deficit disorder or ADHD where the very name of the condition implies that those labeled with it are disordered deficient and incapable of paying attention Those with ADHD grow up wounded told by teachers guidance counselors even parents that they are dysfunctional and unable to succeed in the normal world But as ADHD expert Thom Hartmann explains those with ADHD are capable of great success if they can shift the negative self image created by others and learn to work with their unique strengths In this accessible guide for adults with ADHD and the parents and teachers of ADHD children Hartmann offers a practical system of useful tools and strategies to heal the damage done to a person who grew up labeled as dysfunctional and help them cope with and succeed at daily life He explains how the character traits of ADHD were once valuable assets in hunter gatherer societies and that the later dominance of agricultural and industrial societies where farmer and worker skillsets excel left ADHD hunters as behavioral outcasts Sharing simple and often fast acting techniques from neurolinguistic programming NLP Hartmann explains how those with ADHD can take back their personal power recalibrate painful memories into valuable learning experiences shed fears and negative habits and rebuild their self image in a positive way By integrating the strategies in this book into daily life those with ADHD can transform their way of responding to the world discover personal motivation and teach their children to do the same As Hartmann reveals it is not ADHD that needs to be healed but our attitudes toward those born with the hunter gift

Decisions is organized into three parts that lead readers to understand their behavior and learn how to change it. Psychologist Randy W Green PhD begins by illustrating how people become paralyzed by their own rules leading to indecision and poor decisions that can have serious health consequences. He then explores how past traumas and stress reactions inhibit present choices and the effects our own unique body language has on decision making. And he shows how to make better decisions by shifting our attention away from where we want it least and toward what is possible leading to good decisions that are truly in our best interests.

Wrestling Through Adversity Dr. Christine M. Silverstein, 2023-09-19

From the dark ages the treatment of those mentally ill has progressed from chaining to a wall those afflicted with mental disturbance who never saw the light of day. However in US emergency rooms our young people on the brink of despair are held hostage for psychiatric care. We have been bound to the antiquated biomedical model of mental health care. It is fortunate that we as a society are experiencing a mental health crisis of enormous proportions currently only in the sense that we are beginning to hear a wake up call as we witness a total breakdown of our mental healthcare system regarding the mental stability of our youth and other groups of everyday people. Healthcare professionals and societies are beginning to understand that mental health is integral to overall health and is more than the absence of symptoms of psychological distress. The mastery important to us all includes the acquisition of the capacity to reflect to relate on a deep level with others emotionally and to empathize in the face of change or stressful situations. Resilient young people who possess these qualities and the ability to wrestle through adversity when they have the skillsets to do so lead more successful lives when they know how to make lemonade out of lemons.
