Health And Well Being Across The Life Course:

Health and Well-Being Across the Life Course Mary Larkin, 2013-01-11 Using a life course approach the main chapters in this truly original and enlightening text focus on health and well being during each of our life stages A wide range of contemporary literature from disciplines such as public health sociology epidemiology and social policy are drawn upon to examine key health and well being issues in these stages and to illustrate how health effects can accumulate across the life course Interactive activities based on the text and on extracts from primary sources are used to encourage critical reflection and debate Mary Larkin's book will be essential reading for students on the many courses that need an understanding of health and well being across all age groups It will also be an invaluable resource for those in the health and social care sector as well as practitioners working in the field

Well-Being Marc H. Bornstein, Lucy Davidson, Corey L.M. Keyes, Kristin A. Moore, 2003-02-26 This volume derived from original presentations given at a conference in Atlanta Georgia under the auspices of the Center for Child Well Being Scholars practitioners public health professionals and principals in the child development community convened to address a science based framework for elements of well being and how the elements might be developed across the life course Integrating physical cognitive and social emotional domains Well Being is the first scientific book to consider well being holistically Focusing on a set of core strengths grouped within these three domains the book also includes a fourth section on developmental strengths through adulthood that broadly examines a continuum of health and development as well as transitions in well being This volume takes a developmental perspective across the life course describing foundational strengths for well being the capacities that can be actively developed supported or learned These foundational strengths problem solving emotional regulation and physical safety are the positive underpinnings of early child health and development as well as ongoing well being across the life course Working together and blending their respective disciplinary perspectives and expertise 53 experts in psychology sociology child development and medicine have contributed to the book

Health Economics of Well-being and Well-becoming across the Life-course Rhiannon T. Edwards, Catherine L. Lawrence, 2024-08-28 Discussions about spending on health and social care often fall into silos determined by disease or the cause of death Spending on health and social care is rarely assessed along the lines of a life course model It is also ironic that many public health interventions provide relatively convincing value for money yet we still only spend approximately 5% of the NHS budget on prevention Health Economics of Well being and Well becoming across the Life course follows a life course model with chapters aligned to pregnancy and early years adolescence working age and older age phases of life It enables the reader to think about older age in a different way and asks them to consider where we should be investing in cost effective interventions to support the prevention of chronic disease disability and premature death later in life Academically it brings the rigour of evidence review to an eminently readable book using infographics and take home messages The economic and health economics evidence presented drawing on systematic review

evidence where possible provokes discussion of the tension between prevention and cure in our health and social care systems **The SAGE Encyclopedia of Lifespan Human Development** Dr Marc Bornstein, Marc H. Bornstein, 2018-01-15 In approximately 800 signed articles by experts from a wide diversity of fields this encyclopedia explores all individual and situational factors related to human development across the lifespan *Arts-Based Research, Resilience and Well-being Across the Lifespan* Loraine McKay, Georgina Barton, Susanne Garvis, Viviana Sappa, 2020-01-03 This book investigates how arts based research methods can positively influence people's resilience and well-being particularly in constraining environments Using examples from arts based research methods in different contexts and from across the globe the book brings together a diverse range of perspectives to understand how both resilience and well-being can be supported in a world that is rarely stress free Collectively they demonstrate how arts based research methods can provide agency through the foregrounding of participants' voices afford transformational learning opportunities create opportunities for relationship building support creativity and new ways of thinking generate aspirations and hope encourage forms of communication that expose ideas emotions and feelings that previously might not have been known or known how to be expressed and enhance reflection and reflexivity The authors explore how art based practices such as clowning collage dramatisation drawing painting role play and sculpting can be used to support the resilience and well-being of individuals and groups across the lifespan and theorize how arts based research methods can positively contribute to participants' positive self-esteem self-image and ability to cope with challenges and new circumstances Academics professional learning facilitators higher education students and anyone interested in resilience and well-being in the health and education sectors will find this an interesting and engaging text **Life Course Studies Handbook** Neeraj Venkataraman, 2025-02-20 Life Course Studies Handbook is a comprehensive guide exploring the intricacies of human development across the lifespan Authored by leading experts in life course studies we provide a multidisciplinary perspective on the factors that shape individuals from infancy to old age We examine the interplay of biological psychological social and cultural influences to gain insights into the complex pathways individuals follow as they grow and change Our handbook delves into various life stages from childhood to old age exploring unique challenges and opportunities at each stage We consider factors like socioeconomic status family dynamics and historical context shaping life course trajectories and influencing experiences and outcomes Resilience is a key theme throughout the book We discuss how individuals can adapt and thrive in the face of adversity drawing on social support coping strategies and positive thinking to overcome obstacles and build strength Whether you are a researcher practitioner student or simply interested in understanding human development Life Course Studies Handbook offers valuable insights and practical strategies for navigating the complexities of life We hope this book serves as a valuable resource for exploring the diverse experiences and trajectories that shape individuals across the lifespan *HC 59 - Well-Being - HC 59* Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2014-06-05 The Government's Natural Capital Committee

set up to check how far the Government bases its policies on the cost the benefits the UK derives from its natural environment such as clean air water food and recreation should be put on a permanent statutory footing the Environmental Audit Committee recommends The NCC was set up in May 2012 with a three year remit that ends just before the General Election It has produced 2 progress reports so far highlighting gaps in the available data on these factors and calling for a 25 year plan to plug the gaps and start using the information in Government decisions But the Government has yet to respond in detail to those NCC reports The environment is just one strand of a wider view of people s well being which also addresses people s economic and social circumstances as well as their view of the satisfaction they get from their lives In November 2010 the Prime Minister launched a programme to measure well being to complement economic statistics like GDP in measuring our progress as a country However more than three years since then the Committee note our quality of life is not yet receiving the same attention as those economic metrics The Committee highlight the links being uncovered in the statistics between people s view of their well being and their background and circumstances for example the link between well being and people s health marital status or religion But the MPs warn that the data are not yet sufficiently robust to support a single metric that could encompass well being and which could be set alongside GDP **Men's Health Equity**
