chapter nine Mark Pauly examines the role of price regulation in controlling physician fees Chapter seven focuses on the issue of regulating pharmaceutical prices There are two key issues examined in this paper First is there a clear need for price regulation and second can price regulation work in this industry In response to the first question I come to the conclusion that the proponents of price regulation have not really proven their case Although the financial returns in the pharmaceutical industry have been slightly higher than expected during the 1970s and 1980s there is not overwhelming evidence of price gouging or excessive profits on the part of the industry In response to the second question the answer is clearly no The traditional approaches to price regulation will not have the intended affect of eliminating excess profits from the industry while maintaining the incentives for research and development First rate of return regulation the most natural approach would result in many adverse incentives including excessive investment in research and development in order to inflate the rate base used to calculate the allowable returns

The Future of Health Economics Olivier Ethgen, Ulf Staginnus, 2016-10-14 The pharmaceutical industry faces a well documented perfect storm on the one hand the patent cliff the lack of new blockbusters and on the other economic pressure on pricing from markets with growing expectations and shrinking budgets In the face of such pressure traditional health economics models no longer seem appropriate and yet what do we have to replace them The growing focus on value and cost effectiveness are evidence of new emerging thinking although even here with the shift from medicine as cure to medicine as palliative as a treatment for chronic illness and with the growing emphasis on preventative approaches the landscape is complex and challenging The Future of Health Economics offers a window into some of the most influential emerging issues in pharmacoeconomics issues such as risk sharing and alternative pricing models or the potential impact of radical new approaches such as personalized medicine as well as exploring the changing role of government and regulators Ulf Staginnus and Olivier Ethgen themselves two of the most well regarded practitioners in this field have brought together some leading edge thinkers from industry and academia around the world to provide the industry policy makers regulators health practitioners and academics with the raw material for their future scenarios
