Worksheet 3: Heat vs Temperature

Heat vs Temperature: Heat is a transfer of energy between two objects. Heat does not mean the same thing. Heat is a form of energy which energy moves from a hot area to a cooler area. Temperature is a measurement of how hot or cold something is. Temperature is a scale of energy which temperature is a measure of energy.

Heat: When we think of heat, we should think of the movement of particles. When we see a pot of water on a stove, the heat energy from the stove transfers into the water and it boils. The heat also transfers from the water into the air around it. Heat energy is a form of energy that moves from warmer areas to cooler areas.

Temperature: When we put a pot of water on the stove, the heat energy from the stove makes the water to heat up. Temperature is a measurement of how hot or cold something is. Temperature is a scale of energy which temperature is a measure of energy. The temperature difference between two objects is a measure of energy.
