God And The Embryo Religious Voices On Stem Cells And Cloning:

God and the Embryo Brent Waters, Ronald Cole-Turner, 2003-07-22 Discussions and debates over the medical use of stem cells and cloning have always had a religious component But there are many different religious voices This anthology on how religious perspectives can inform the difficult issues of stem cell research and human cloning is essential to the discussion Contributors reflect the spectrum of Christian responses from liberal Protestant to evangelical to Roman Catholic The noted moral philosopher Laurie Zoloth offers a Jewish approach to cloning and Sondra Wheeler contributes her perspective on both Jewish and Christian understandings of embryonic stem cell research In addition to the discussions found here *God and the Embryo* includes a series of official statements on stem cell research and cloning from religious bodies including the Roman Catholic Church the Orthodox Church in America the United Methodist Church the Southern Baptist Convention the United Church of Christ the Presbyterian Church USA and the Union of Orthodox Jewish Congregations of America and the Rabbinical Council of America *Human Cloning and Human Dignity An Ethical Inquiry* from the statement of the President's Council on Bioethics concludes the book The debates and the discussions will continue but for anyone interested in the nuances of religious perspectives that make their important contributions to these ethically challenging and important dialectics *God and the Embryo* is an invaluable resource *Stem Cells, Human Embryos and Ethics* Lars Østnor, 2008-04-03

Is it acceptable from an ethical point of view to use stem cells from human embryos for scientific research and clinical therapy And what are the weaknesses and strengths of various opinions and positions when they are critically evaluated These are the main problems dealt with in this book The various chapters as a whole give a comprehensive many sided and balanced discussion of the subject The book contains contributions from biological medical social political philosophical and theological perspectives The authors have been chosen because of their professional competence many of them being respected scholars on a top international level They give an updated contribution from their own discipline in order to enlighten the different aspects of the common theme The authors cover various positions and evaluations with regard to the question of the use of embryonic stem cells for research and therapy The book is written for several audiences a scholars and professionals working with stem cell research or with the ethical questions arising from this field people from biology medicine law philosophy theology etc b advanced and graduate students within the same professional disciplines and c politicians and the general public interested in the burning ethical problems which are intensively debated in many countries **The Death of Metaphysics; The Death of Culture** Mark J. Cherry, 2006-08-05

The Latin root of the English word culture ties together both worship and the tilling of the soil In each case the focus is the same a rightly directed culture produces either a bountiful harvest or falls short of the mark materially or spiritually This volume critically explores the nature and depth of our contemporary cultural crisis its lack of traditional orientation and moral understanding Prime among the issues at stake are the meaning and significance of birth copulation suffering and

death expressed in debates regarding human embryo experimentation and stem cell research the character of moral and scientific norms as well as more fundamentally the character of an adequate epistemology for coming to appreciate the deep nature of reality and its normative implications Given varying background ontological epistemological and axiological presuppositions different moral positions and political objections will appear as not merely morally permissible but as socially and politically obligatory

Selfish Genes and Christian Ethics Neil Messer, 2007-03-30 The evolutionary origins of human beings and in particular the origins of human morality have always attracted debate and speculation not just in the academic community but in popular science and the wider general population as well The arguments and explanations put forward over the years seem to thoroughly catch the popular imagination but there is the danger that these explanations tend to step outside the bounds of scientific theory and become powerful popular myths instead In Neil Messer's *Selfish Genes and Christian Ethics* the author is challenging this tendency Instead he provides a Christian theological anthropology which among other things aims to give Christians and the churches the confidence to engage with assumptions that evolutionary theory and religious beliefs are untenable This is a valuable resource for anyone engaged in the study of theology providing the reader with the ability to consider both the theoretical and the practical questions raised by evolutionary discussions of ethics and morality

Bioethics Lisa Sowle Cahill,2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In Theological Bioethics Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national levels In Cahill s eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom *Technē* Gerald Hiestand,Todd A.

Wilson,2022-11-18 Christians have an increasingly complex and often conflicted relationship with technology As Genesis 1 succinctly and profoundly declares God created humanity in his image and as part of that vocation we are called to make something of the world Technology is one of the most important and powerful ways that human beings exercise this dominion But while technology can extend our humanity in powerful and exciting ways many of us feel that it can compromise or fracture our humanity at its core As a result questions quickly emerge What does it mean to be human How does our creation in the image of God affect the way we use design and understand technology Should our general posture toward technology be cautious or optimistic This collection of scholarly and pastoral essays drawn from the 2019 annual theology conference of the Center for Pastor Theologians offers substantive Christian reflection on a wide range of issues pertinent to a distinctly Christian vision of technology today and in the future **Controversies in Contemporary Religion** Paul
