

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light. These rays, labeled 'Incoming solar radiation', travel downwards towards a cross-section of the Earth. The Earth is shown with a blue atmosphere and a green and blue surface. On the left, some rays are reflected away from the Earth's surface and atmosphere, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. In the center, most rays are absorbed by the Earth's surface, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. On the right, some rays are shown passing through the atmosphere and out into space, labeled 'Some heat passes out into Space'. Another set of rays is shown being re-emitted by the atmosphere back towards the Earth's surface, labeled 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth'. The word 'Earth' is written in the center of the globe.
