Manual Lhn 250

J Elliott

Manual Lhn 250:

Fish species identification manual for deep-bottom snapper fishermen Lindsay Chapman, Aymeric Desurmont, Pierre Boblin, William Sokimi, Steve Beverly, 2008-01-01 The overall aim of this manual is to improve and increase the amount and accuracy of catch data provided by deep bottom snapper fishers in the Pacific Islands region when they complete their catch and effort logsheets and to encourage those who do not complete logsheets to start doing so It will enable fishers to more accurately identify the fish they catch and to record species previously not recorded because they did not know what they were or considered them insignificant or irrelevant The manual is presented in eight tabbed sections for ease of use Each section starts with a list of the species covered in the section with the scientific and standard FAO English and French names when there was no FAO name for a species the authors retained the name most commonly used in the Pacific Islands region and the FAO species code to be used by fishers when completing their logsheets Within each species group species that may be hard to distinguish have been presented on opposite or adjoining pages to make identification easier Publication s home page
