Going Up Elisha Otis Trip To The Top Great Idea Series:

Going Up! Monica Kulling, 2014-04-08 In 1818 seven year old Elisha was fascinated by farm machinery As a young man he tried a variety of ways to make a living but nothing fired his imagination more than the job he found in a bed frame factory Soon he invented a machine that made frames four times faster than ever before In 1852 while overseeing the construction of a new factory he had to find a way to move heavy machinery to the second floor He didn't trust the hoisting platform so he invented a safety brake It was so successful that rather than lift machine parts Elisha decided to build people hoisting machines In 1857 Elisha Otis installed his first successful passenger elevator in a five storey department store in New York City Before Elisha's invention buildings were never higher than six stories At last it was possible to build skyscrapers
