Unravelling the Evolution of Language Rudolf P. Botha, 2021-11-22 What blocks the way to a better understanding of language evolution it is widely held is above all a paucity of factual evidence Not so argues Unravelling the Evolution of Language This book finds the main obstacle instead in a poverty of a specific kind of theory restrictive theory It shows too that this poverty of restrictive theory is one of the root causes of the paucity of factual evidence Unravelling takes it that a theory of a thing T for example language is restrictive if it gives us a basis for distinguishing T in a non arbitrary way from all things that are in fact distinct from it including those that happen to be related to it The book then argues in detail that much of the recent work on language evolution proceeds from loose assumptions rather than restrictive theories about a number of crucial things The entities prelinguistic or linguistic that are believed to have undergone evolution the processes by which these entities are believed to have evolved the ways in which these pre linguistic entities link up with entities that are believed to be correlates of them the sources of data that are believed to yield indirect evidence about the evolution of language and the factors that add to or subtract from the scientific substance of accounts of language evolution In support of its main argument Unravelling the Evolution of Language puts forward detailed analyses of various recent accounts of language evolution including co optationist accounts by Noam Chomsky Stephen Jay Gould Massimo Piattelli Palmarini and Lyle Jenkins preadaptationist accounts by Philip Lieberman Wendy Wilkins Jenny Wakefield Andrew Carstairs McCarthy William Calvin and Derek Bickerton adaptationist accounts by Steven Pinker Paul Bloom and others This means that Unravelling as it builds its main argument also offers an appraisal of some significant contributions to recent work on language evolution
