In this seminal text exploring a wide range of topics and in the devastating wake of COVID-19, scholars and practitioners analyse the effectiveness of current and proposed actions to build a sustainable future and the public and private finance necessary to prevent an impending planetary catastrophe. The first section of the handbook introduces readers to the origins and evolution of sustainable development. An examination of public and private finance follows in the next two sections presented from the perspectives of authors from both developed and developing countries. Climate change, one of the largest sectors of finance for sustainable development, is investigated in detail, as is the new and emerging development frontier, the blue economy of the world's oceans. Suitable for students, policymakers and the public at large, the handbook highlights the lessons learned and points the way forward for sustainable development and finance in the wake of the global pandemic and the challenges to come.

Leaving Fossil Fuels Underground Joyeeta Gupta, Barbara Hogenboom, Arthur Rempel, Malin Olofsson, 2025-10-01. How can the world move away from a century-old global system based on fossil fuels? And how can societies in the Global South and Global North overcome the deeply vested economic, financial and political interests of the fossil fuel system? Despite the alarming effects of climate change and three decades of international climate negotiations, industrialized countries continue to exploit new fossil fuel reserves. Many countries in the Global South follow suit and still engage in large new fossil fuel projects and their related pollution, social injustice and debts. Increasingly, however, social and political actors are mobilising for leaving fossil fuels underground. LFFU. This book examines the role of key actors, arguments and approaches in promoting the much-needed rapid phase-out of fossil fuels. It addresses the importance of linking effective climate action to socially and ecologically inclusive development. In addition to local resistance, the book explores initiatives for national and international policies and financial mechanisms carried out by actors ranging from social movements to governments and large investors. In *Leaving Fossil Fuels Underground*, an international team of well-established scholars and early career researchers takes a global perspective to

demonstrate the challenges and possibilities of reaching this goal They pay special attention to Africa and Latin America with case studies on South Africa and Ecuador **How Power Shapes Energy Transitions in Southeast Asia** Jens
