Greening Auto Jobs A Critical Analysis Of The Green Job Solution:

Greening Auto Jobs Caleb Goods,2014 **Greening Auto Jobs** Caleb Goods,2014-08-07 Greening Auto Jobs A Critical Analysis of the Green Job Solution details current and problematic understandings of what constitutes a green job Adopting an approach grounded in critical political economy this book presents a framework to scrutinize the green job solution and the theoretical framework which overwhelmingly informs contemporary green job creation efforts and ecological modernization The text also explores the tensions that encircle the world of work and environmental action often referred to as jobs versus the environment by detailing the conflicting commitments of political economic actors to the idea of green job creation These conflicts are outlined through an examination of the political economic debate that has surrounded the Australian Government s environmental plans from 2008 to 2012 and the conflicting positions of Australian trade unions on environmentally transitioning the world of work Interviews with key political economic actors provide in depth and nuanced understandings of the varied perspectives of political and union leaders in Australia The second part of the book presents a detailed case study of the posited green job solution within the specific context of the Australian automotive manufacturing industry The case study is also informed by interviews with key industry union and policymakers The automotive industry is scrutinized not only because it has expressed going green as important to its long term economic future but because the Australian Government declared that its 6.2 billion New Car Plan for a Greener Future policy would create green jobs Therefore the book engages with the task of examining the three multinational vehicle producers operating in Australia Ford GM Holden and Toyota and how they have responded and engaged with the idea of green jobs greening the manufacturing process and the vehicles they produce in Australia *Research Handbook on Decent Work in a Post-COVID-19 World* Jason Heyes,Janine Leschke,Kirsty Newsome,Michael Reich,Adrian Wilkinson,2025-01-09 The *Research Handbook on Decent Work in a Post COVID 19 World* is an essential read assessing prospects for employment labour standards and the organisation of work in the wake of the pandemic Contributing authors cover key developments and challenges in the field from low pay to social protection **Ecotopia 2121** Alan Marshall,2016-10-04 A 2016 Green Book Festival Future Forecasts Winner A stunningly original lushly illustrated vision for a Green Utopia published on the 500th anniversary of the original Big Idea Five hundred years ago a powerful new word was unleashed upon the world when Thomas More published his book *Utopia* about an island paradise far away from his troubled land It was an instant hit and the literati across Europe couldn t get enough of its blend of social fantasy with a deep desire for a better world Five hundred years later *Ecotopia 2121* once again harnesses the power of the utopian imagination to confront our current problems among them climate change and offer a radical alternative vision for the future of our troubled planet Depicting one hundred cities around the globe from New York to San Francisco London Tokyo Sydney Rio de Janeiro Mexico City Beijing Vienna Singapore Cape Town Abu Dhabi and Mumbai Alan Marshall imagines how each may survive and prosper A striking full color scenario painting illustrates each city

The chapters tell how each community has found either a social or technological innovation to solve today's crises. Fifteen American cities are covered. Around the world, urban planners like to tailor scenarios for the year 2020 to take advantage of the metaphor of 20/20 vision. In *Ecotopia 2121*, the vision may be fuzzy, but its sharp insights, captivating illustrations, and playful storytelling will keep readers coming back again and again. **What's Wrong with Work?** Lynne

Pettinger, 2019-04-24 Why does work matter? As changes occur in how work is organised across the globe, what's wrong with work shows that how workers are treated has wide implications beyond the lives of workers themselves. Recognising gender, race, class, and global differences, the book looks at three kinds of increasingly important work: green work, IT work, and the gig economy. Within the context of the neoliberal society, the promises of technologisation and anticipated environmental catastrophe, it considers the ways formal work is often dependent on informal work, especially domestic work and care work. Accessible and engaging, it concludes by considering political and ethical questions in what might make work better, arguing that there is a collective responsibility to address bad work. **Smart Cities** Enrique Alba, Francisco Chicano, Gabriel

Luque, 2017-06-07 This book constitutes the proceedings of the second International Conference on Smart Cities Smart CT 2017 held in Málaga, Spain, in June 2017. The 16 papers presented in this volume were carefully reviewed and selected from 21 submissions. The topics covered include studies and tools to improve road traffic, energy consumption, logistics, frameworks to provide new services, and take decisions in a holistic way, driving assistance, electric vehicles, public transport, and surveys on smart city concepts. **Greening Our Economy for a Sustainable Future** Simon Grima, Kiran Sood, Ercan Ozen, Rebecca

Emily Dalli Gonzi, 2024-10-17 *Greening Our Economy for a Sustainable Future* examines the green economy by balancing social needs, the environment, and the economy. It argues that different economic models must be developed to address the environment caused by economic expansion. The book not only looks at the opportunities of having a green economy but also goes into areas such as greenwashing, social washing, sustainability, economics, and more. In addition, it addresses how one can improve well-being through a symbiotic relationship between economic growth and environmental stewardship. Reviews literature and case studies that can be applied on a large scale on measures to change the way of economic development to implement a green economy theory. Examines bottlenecks that occur when resource scarcity or poor quality makes

investment more expensive. Highlights opportunities for innovation spurred by policies and framework conditions that allow for new ways of addressing environmental problems. **Video Source Book**, 2006 A guide to programs currently available on video in the areas of movies, entertainment, general interest, education, sports, recreation, fine arts, health, science, business, industry, children, juvenile, how-to, instruction. **Green Jobs for Sustainable Development** Ana-Maria Boromisa, Sanja

Tišma, Anastasya Ležaić, 2015-06-26 A green economy must be built on green jobs, the kind of employment that is low carbon, intended to reduce energy use, and expected to restore environmental quality. But attempts to define exactly what a green job is have led to varied and often contradictory answers. There are many unresolved questions, including whether we consider

jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics

Greening Industries and Creating Jobs Bela Galgoczi, 2012 How the objective of a resource efficient low carbon economy is to be reached and how the transition is managed are the key issues addressed by this publication The two main focuses are industrial policy and employment prospects on the road to a green economy that retains its industrial base Any lasting recovery of the real economy will necessarily take the shape of a more resource efficient production model While we argue that only a more ambitious and comprehensive European climate policy framework would have a chance of delivering the broader 2050 climate targets this does not mean that Europe has to give up its industrial base and its related competences Several chapters of this book argue that the option of attaining a low carbon economy through deindustrialisation would prevent Europe from preserving its competitiveness and knowledge base which are also essential for exploiting the potential of the emerging eco industry While decoupling economic growth from resource use is also possible with an industrial base that is more energy and resource efficient this does require a fundamental shift in terms of how the economy is managed and how business decisions are made Sustainable industrial and structural policies are needed also in order to ensure that this revolutionary process takes place in a socially balanced manner
