

HISTORY OF THE ATOM

GENERAL CHEMISTRY 1

DATE: SEPT 15, 2020

MADE BY: ELLA SABIDO 11SP

DEMOCRITUS (400 B.C.)

- formulated the term 'atom' and believed that matter can be broken down to its simplest and smallest substance called atom.

ARISTOTLE (300 B.C. - 1800's)

- dismissed the idea of atoms and declared that all matter was made of only four elements: fire, air, water and earth.
- believed that there are only five elements that exist: fire, water, earth and air.

DALTON (1803)

- he theorized that all matter is made of atoms. Atoms are too small to see, "uncuttable," and indestructible.
- developed the atomic theory: All atoms of a given element are exactly alike and atoms of different elements are different.

BILLIARD BALL ATOM

THOMSON (1897)

- he discovered the presence of the electron.
- he proposed a model of the atom that is sometimes called the "Plum Pudding" model. His theory was that atoms are made from a positively charged substance with negatively charged electrons scattered about, like raisins in a pudding or chocolate chips in a cookie.

PLUM PUDDING

RUTHERFORD (1908)

- he performed an experiment using positively charged particles fired at gold foil.
- he theorized that atoms have a small, dense, positively charged center, which he called the "nucleus".

NUCLEUS MODEL

BOHR (1913)

- he suggested that electrons orbit in different levels.
- he studied the structure of atoms based on Rutherford's discoveries.
- the more energy an atom gives off, the closer it is to the nucleus, the more it absorbs, the farther away.

BOHR MODEL OR THE QUANTUM MODEL

MODERN CLOUD THEORY (20th Century)

- according to today's atomic theory, in the electron cloud, electrons whirl around the nucleus billions of times in one second. They are not moving around in random patterns; an electron's location depends upon how much energy the electron has.

Enlightenment Orientalism Srinivas Aravamudan, 2024-05-31 Srinivas Aravamudan here reveals how Oriental tales pseudo ethnographies sexual fantasies and political satires took Europe by storm during the eighteenth century Naming this body of fiction Enlightenment Orientalism he poses a range of urgent questions that uncovers the interdependence of Oriental tales and domestic fiction thereby challenging standard scholarly narratives about the rise of the novel More than mere exoticism Oriental tales fascinated ordinary readers as well as intellectuals taking the fancy of philosophers such as Voltaire Montesquieu and Diderot in France and writers such as Defoe Swift and Goldsmith in Britain Aravamudan shows that Enlightenment Orientalism was a significant movement that criticized irrational European practices even while sympathetically bridging differences among civilizations A sophisticated reinterpretation of the history of the novel Enlightenment Orientalism is sure to be welcomed as a landmark work in eighteenth century studies *The Atom in Seventeenth-century Poetry* Cassandra Gorman, 2021 An investigation into the remarkable poetics of the atom in English literary texts from the mid to late seventeenth century The early modern atom understood as an indivisible particle of matter captured the poetic imagination in ways that extended far beyond the reception of Lucretius and Epicurean atomism Contrarily to fears of atomisation and materialist threat many poets and philosophers of the period sought positive spiritual motivation in the concept of material indivisibility This book traces the metaphysical import of these poetic atoms teasing out an affinity between poetic and atomic forms in seventeenth century texts In the writings of Henry More Thomas Traherne Margaret Cavendish Hester Pulter and Lucy Hutchinson both atoms and poems were instrumental in acts of creating ordering and reconstructing knowledge Their poems emerge as exquisitely self conscious atomic forms producing intimate reflections on the creative power and indivisibility of self soul and God The book begins with a survey of the imaginative possibilities surrounding the early modern atom before considering the indivisible centres of the Cambridge Platonist Henry More s cosmic Spenserian poetics The focus then turns to the lyrical bond formed between atom and soul in the writings of Thomas Traherne and from there to the experimental sequences of Margaret Cavendish and Hester Pulter whose poetic spaces create new worlds and imagine alternative lives The book concludes with a study of Lucy Hutchinson s creation poem Order and Disorder which anticipates the regeneration of fallen being in atomic and alchemical terms *Humanities Index*, 1987 Spotlight Science Keith Johnson, Sue Adamson, Gareth Williams, 2002 This Spiral Edition Teacher Support Pack offers comprehensive support and guidance providing the best possible learning experience for your students and saving time for everyone in the department *An Analysis of Carlo Ginzburg's The Night Battles* Etienne Stockland, Luke Freeman, 2017-07-05 In *The Night Battles* Carlo Ginzburg does more than introduce his readers to a novel group of supposed witches the Benandanti from the northern Italian province of Friulia He also invents and deploys new and creative ways of tackling his source material that allow him to move beyond their limitations Witchcraft documents are notoriously tricky

sources produced by elites with fixed views they are products of questioning designed to prove or disprove guilt rather than understand the subtleties of belief and are very often the products of torture Ginzburg placed great stress on variations in the evidence of the Benandanti over time to reveal changing patterns of belief and also focused on the concept of reading against the text essentially looking as much at what is absent from the record as at what is present in it and attempting to understand what the absences mean His work not only pioneered the creation of a new school of historical study microhistory it is also a great example of the creative thinking skills of connecting things together in an original way producing novel explanations for existing evidence and redefining an issue so as to see it in a new light

Compiling Texts

in Eighteenth-Century Britain Rebeca Araya Acosta, 2024-08-23 This book argues that the act of compiling texts together into collections in the eighteenth century is politically and epistemologically significant Focusing on the reception of Scottish Enlightenment ideas and ranging across an Edinburgh print shop an excluded religious community in the North of England and the story worlds of novelists and poets the study reveals compilation to be a politically resistant activity it challenged centralizing and homogenizing tendencies within the growing British empire in the latter half of the eighteenth century and actively built counternarratives Rebeca Araya Acosta offers a fresh view of eighteenth century literary transaction and shows how practices of compilation in the period were more diversified and had a far greater impact on readers than their modern descendants
