Examinations in Late Imperial China Benjamin A. Elman,2000-03-22 In this multidimensional analysis Benjamin A Elman uses over a thousand newly available examination records from the Yuan Ming and Ch ing dynasties 1315 1904 to explore the social political and cultural dimensions of the civil examination system one of the most important institutions in Chinese history For over five hundred years the most important positions within the dynastic government were usually filled through these difficult examinations and every other year some one to two million people from all levels of society attempted them Covering the late imperial system from its inception to its demise Elman revises our previous understanding of how the system actually worked including its political and cultural machinery the unforeseen consequences when it was unceremoniously scrapped by modernist reformers and its long term historical legacy He argues that the Ming Ch ing civil examinations from 1370 to 1904 represented a substantial break with T ang Sung dynasty literary examinations from 650 to 1250 Late imperial examinations also made Tao Learning Neo Confucian learning the dynastic orthodoxy in official life and in literati culture The intersections between elite social life popular culture and religion that are also considered reveal the full scope of the examination process throughout the late empire **The Publishers Weekly** ,1924 [Smoke and Ashes](#)

Amitav Ghosh,2024-02-13 Named a Most Anticipated Book of 2024 by Foreign Policy Literary Hub and The Millions Ghosh unravels the impact of the opium trade on global history and in his own family the climax of a yearslong project When Amitav

Ghosh began the research for his monumental cycle of novels the Ibis Trilogy he was startled to learn how the lives of the nineteenth century sailors and soldiers he wrote about were dictated not only by the currents of the Indian Ocean but also by the precious commodity carried in enormous quantities on those currents opium Most surprising of all however was the discovery that his own identity and family history were swept up in the story Smoke and Ashes is at once a travelogue a memoir and an essay in history drawing on decades of archival research In it Ghosh traces the transformative effect the opium trade had on Britain India and China as well as the world at large The trade was engineered by the British Empire which exported Indian opium to sell to China to redress their great trade imbalance and its revenues were essential to the empire's financial survival Following the profits further Ghosh finds opium central to the origins of some of the world's biggest corporations of America's most powerful families and prestigious institutions from the Astors and Coolidges to the Ivy League and of contemporary globalism itself Moving deftly between horticultural history the mythologies of capitalism and the social and cultural repercussions of colonialism in Smoke and Ashes Ghosh reveals the role that one small plant has had in making our world now teetering on the edge of catastrophe

A Concise History of India Barbara D. Metcalf, Thomas R. Metcalf, 2002 Two distinguished historians Barbara Metcalf and Thomas Metcalf come together to write a new and accessible account of modern India The narrative which charts the history of India from the Mughals through the colonial encounter and independence to the present day challenges imperialist notions of an unchanging and monolithic India bounded by tradition and religious hierarchies Instead the book reveals a complex society which is constantly transforming and reinventing itself in response to political and social challenges The book is beautifully composed and richly illustrated It will be essential reading for anyone who wants to understand India her turbulent past and her present uncertainties
