Finding the Synoptic Gospels' Construction Process Hojoon Ahn,2024-06-11 This study critically examines the current state of Synoptic Gospel studies particularly many scholars reliance on the Literary Dependence Hypothesis and endeavors to advance a more balanced approach The author attempts to deduce the Synoptic Gospels construction process by meticulously examining the Eucharist and its co text within these Gospels by employing a model of Mode Register Analysis based on Systemic Functional Linguistics This study uncovers the probability that each designated text in the Synoptic Gospels was constructed based on oral Gospel tradition s under the influence of each constructor s identity

The Negative Existential Cycle Ljuba Veselinova,Arja Hamari,2022-12-20 In 1991 William Croft suggested that negative existentials typically lexical expressions that mean not exist not have are one possible source for negation markers and gave his hypothesis the name Negative Existential Cycle NEC It is a variationist model based on cross linguistic data For a good twenty years following its formulation it was cited at face value without ever having been tested by historical comparative data Over the last decade Ljuba Veselinova has worked on testing the model in a comparative perspective and this edited volume further expands on her work The collection presented here features detailed studies of several language families such as Bantu Chadic and Indo European A number of articles focus on the micro variation and attested historical developments within smaller groups and clusters such as Arabic Mandarin and Cantonese and Nanaic Finally variation and historical developments in specific languages are discussed for Ancient Hebrew Ancient Egyptian Moksha Mordvin Uralic Bashkir Turkic Kalmyk Mongolic three Pama Nyungan languages O dam Southern Uto Aztecan and Tacana Takanan Amazonian Bolivia The book is concluded by two chapters devoted to modeling cyclical processes in language change from different

theoretical perspectives Key notions discussed throughout the book include affirmative and negative existential constructions the expansion of the latter into verbal negation and subsequently from more specific to more general markers of negation Nominalizations as well as the uses of negative existentials as standalone negative answers figure among the most frequent pathways whereby negative existentials evolve as general negation markers The operation of the Negative Existential Cycle appears partly genealogically conditioned as the cycle is found to iterate regularly within some families but never starts in others as is the case in Bantu In addition other special negation markers such as nominal negators are found to undergo similar processes i e they expand into the verbal domain and thereby develop into more general negation markers The book provides rich information on a specific path of the evolution of negation on cyclical processes in language change and it shows cases the historical comparative method in a modern setting

The Linguistics of Temperature Maria Koptjevskaja-Tamm, 2015-02-11 The

volume is the first comprehensive typological study of the conceptualisation of temperature in languages as reflected in their systems of central temperature terms hot cold to freeze etc The key issues addressed here include questions such as how languages categorize the temperature domain and what other uses the temperature expressions may have e g when metaphorically referring to emotions warm words The volume contains studies of more than 50 genetically areally and typologically diverse languages and is unique in considering cross linguistic patterns defined both by lexical and grammatical information The detailed descriptions of the linguistic and extra linguistic facts will serve as an important step in teasing apart the role of the different factors in how we speak about temperature neurophysiology cognition environment social cultural practices genetic relations among languages and linguistic contact The book is a significant contribution to semantic typology and will be of interest for linguists psychologists anthropologists and philosophers

The Morphosyntax of Negative Markers Karen De Clercq, 2020-06-08 This book applies the tools of nanosyntax to the natural language phenomenon of negation Most work on negation is concerned with the study of sentence negation while low scope negation or constituent negation is hardly ever systematically discussed in the literature The present book aims to fill that gap by investigating scopally different negative markers in a sample of 23 typologically diverse languages A four way classification of negative markers is argued for and it is shown how meaningful syncretism patterns arise across those four groups of negative markers in the language sample investigated The syncretisms are meaningful in that they track the natural semantic scope of negation and provide support to the idea that morphology is not arbitrary but points to submorphemic structure Consequently this study leads to a decomposition of the negative morpheme into five privative features Tense Focus Classification Quantity and Negation proper Finally the book argues that sentence constituent and lexical negation can all be treated in the same module of the grammar i e syntax

Balkan Syntax and (Universal) Principles of Grammar Iliyana Krapova, Brian Joseph, 2018-11-19 This book investigates morpho syntactic convergences that characterize the languages of the Balkan Sprachbund Balkan Slavic Greek Romanian Albanian Balkan Romani Apart from new data the volume features contributions within different theoretical frameworks contact linguistics functional linguistics typology areal linguistics and generative grammar
