It is a puzzle that while academic research has increased in specialization the important and complex problems facing humans urgently require a synthesis of understanding. This unique collaboration attempts to address such a problem by bringing together

De Gruyter Handbook of Sustainable Development and Finance Timothy Cadman, Tapan Sarker, 2022-09-20. The De Gruyter Handbook of Sustainable Development and Finance explores the difficult and challenging issues confronting society and the environment in the contexts of unprecedented climate change, biodiversity loss and the global pandemic. In this seminal text exploring a wide range of topics and in the devastating wake of COVID-19, scholars and practitioners analyse the effectiveness of current and proposed actions to build a sustainable future and the public and private finance necessary to prevent an impending planetary catastrophe. The first section of the handbook introduces readers to the origins and evolution of sustainable development. An examination of public and private finance follows in the next two sections presented from the perspectives of authors from both developed and developing countries. Climate change, one of the largest sectors of finance for sustainable development, is investigated in detail, as is the new and emerging development frontier, the blue economy of the world's oceans. Suitable for students, policymakers and the public at large, the handbook highlights the lessons learned and points the way forward for sustainable development and finance in the wake of the global pandemic and the challenges to come.

Leaving Fossil Fuels Underground Joyeeta Gupta, Barbara Hogenboom, Arthur Rempel, Malin Olofsson, 2025-10-01. How can the world move away from a century-old global system based on fossil fuels? And how can societies in the Global South and Global North overcome the deeply vested economic, financial and political interests of the fossil fuel system? Despite the alarming effects of climate change and three decades of international climate negotiations, industrialized countries continue to exploit new fossil fuel reserves. Many countries in the Global South follow suit and still engage in large new fossil fuel projects and their related pollution, social injustice and debts. Increasingly, however, social and political actors are mobilising for leaving fossil fuels underground. LFFU. This book examines the role of key actors, arguments and approaches in promoting the much-needed rapid phase-out of fossil fuels. It addresses the importance of linking effective climate action to socially and ecologically inclusive development. In addition to local resistance, the book explores initiatives for national and international policies and financial mechanisms carried out by actors ranging from social movements to governments and large investors. In *Leaving Fossil Fuels Underground*, an international team of well-established scholars and early career researchers takes a global perspective to

demonstrate the challenges and possibilities of reaching this goal They pay special attention to Africa and Latin America with case studies on South Africa and Ecuador **How Power Shapes Energy Transitions in Southeast Asia** Jens

Marquardt,2016-12-01 An understanding of the role of energy related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low carbon development Although renewable energy sources have become technically feasible and economically viable social and political factors continue to persist as the most critical obstacles for their dissemination How Power Shapes Energy Transitions in Southeast Asia conceptualizes power for the field of sustainable energy governance Based on empirical findings from the Philippines and Indonesia the book develops an analytical approach that incorporates power theory into a multi level governance framework The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation A power based multi level governance approach is introduced that is rooted in development thinking Examining how coordination and power relations shape the development and dissemination of renewable energy technologies the book also shows how decentralization affects low carbon development in emerging economies Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation **Climate Change, Ethics**

and Human Security Karen O'Brien,Asunción Lera St. Clair,Berit Kristoffersen,2010-07-22 Presenting human security perspectives on climate change this volume raises issues of equity ethics and environmental justice as well as our capacity to respond to what is increasingly considered to be the greatest societal challenge for humankind Written by international experts it argues that climate change must be viewed as an issue of human security and not an environmental problem that can be managed in isolation from larger questions concerning development trajectories and ethical obligations towards the poor and to future generations The concept of human security offers a new approach to the challenges of climate change and the responses that could lead to a more equitable and sustainable future Climate Change Ethics and Human Security will be of interest to researchers policy makers and practitioners concerned with the human dimensions of climate change as well as to upper level students in the social sciences and humanities interested in climate change **Advances in International**

Environmental Politics in Egypt Jeannie Sowers, 2013-06-26 This book examines the evolution and development of environmental politics in Egypt and how networks operate inside an authoritarian system Tracing attempts by environmental networks to control industrial pollution create and preserve protected areas and restructure the management of Egypt's scarce water supplies the author contributes to a more refined understanding of public policy making and social protest under authoritarian rule in Egypt and the Arab world

Banking on Beijing Axel Dreher, Andreas Fuchs, Bradley Parks, Austin Strange, Michael J. Tierney, 2022-05-05 China is now the lender of first resort for much of the developing world but Beijing has fueled speculation among policymakers scholars and journalists by shrouding its grant giving and lending activities in secrecy Introducing a systematic and transparent method of tracking Chinese development projects around the world this book explains Beijing's motives and analyzes the intended and unintended effects of its overseas investments Whereas China almost exclusively provided aid during the twentieth century its twenty first century transition from benefactor to banker has had far reaching impacts in low income and middle income countries that are not widely understood Its use of debt rather than aid to bankroll big ticket infrastructure projects creates new opportunities for developing countries to achieve rapid socio economic gains but it has also introduced major risks such as corruption political capture and conflict This book will be of interest to policymakers students and scholars of international political economy Chinese politics and foreign policy economic development and international relations
