His Invention So Fertile A Life Of Christopher Wren:

His Invention So Fertile Adrian Tinniswood,2001 It also shows us the man behind the legend Wren was married and widowed twice he fathered a mentally handicapped child quarrelled with his colleagues and fell foul of his employers He scrambled over building sites and went to the theatre and drank in coffee houses The book explores what it was like to be at Oxford during the Commonwealth as a generation struggled to make sense of a society in chaos it recreates the tensions which tore apart the court of James II it brings to life the petty jealousies that formed an integral part of both the building world and the scientific milieu of the Royal Society **BOOK JACKET** *The Curious Eye* Erin Webster,2020-02-20 The Curious Eye explores early modern debates over two related questions what are the limits of human vision and to what extent can these limits be overcome by technological enhancement In our everyday lives we rely on optical technology to provide us with information about visually remote spaces even as we question the efficacy and ethics of such pursuits But the debates surrounding the subject of technologically mediated vision have their roots in a much older literary tradition in which the ability to see beyond the limits of natural human vision is associated with philosophical and spiritual insight as well as social and political control The Curious Eye provides insight into the subject of optically mediated vision by returning to the literature of the seventeenth century the historical moment in which human visual capacity in the West was first extended through the application of optical technologies to the eye Bringing imaginative literary works by Francis Bacon John Milton Margaret Cavendish and Aphra Behn together with optical and philosophical treatises by Johannes Kepler Ren Descartes Robert Hooke Robert Boyle and Isaac Newton the volume explores the social and intellectual impact of the new optical technologies of the seventeenth century on its literature At the same time it demonstrates that social political and literary concerns are not peripheral to the optical science of the period but rather an integral part of it the legacy of which we continue to experience **The Pocket** Barbara Burman,Ariane Fennetaux,2020-04-24 A New York Times Best Art Book of 2019 A riveting book few stones are left unturned Roberta Smith's Top Art Books of 2019 The New York Times This fascinating and enlightening study of the tie on pocket combines materiality and gender to provide new insight into the social history of women's everyday lives from duchesses and country gentry to prostitutes and washerwomen and to explore their consumption practices sociability mobility privacy and identity A wealth of evidence reveals unexpected facets of the past bringing women's stories into intimate focus What particularly interests Burman and Fennetaux is the way in which women of all classes have historically used these tie on pockets as a supplementary body part to help them negotiate their way through a world that was not built to suit them Kathryn Hughes The Guardian A brilliant book Ulinka Rublack Times Literary Supplement **First Friend** Katharine Rogers,2010-04 Dogs have shared our homes for as long as we can remember and in return have guarded us helped us hunt and herded our livestock They have generally been our friends as well that is what most of them are today Canine friends give us uncritical affection free of the ambivalence that plagues human relationships

Dogs figure prominently in literature starting with Homer's Argus the hound who remembered Odysseus after twenty years. Victorian novels are full of vivid canine characters. Ms Rogers is impressively thorough. Best of all the author knows and respects dogs. Steve Goode Washington Times

"The Great Ocean of Knowledge" Ann Talbot, 2010-01-01 This book explores the way in which working within the investigative tradition associated with the Royal Society the philosopher John Locke 1632-1704 used travellers' reports to develop a form of comparative social anthropology which was to inform his major philosophical works

Engineers Matthew Wells, 2010-03-04 Describes and illustrates engineering design and what conditions, events, cultural influences and personalities have brought it to its present state. For professional and student architects and engineers

Timeless Management A. Coppin, J. Barratt, 2002-05-29 Today's managers are bombarded with a constant stream of management fads and fashions, each claiming to be the key to business success. In this new book Alan Coppin and John Barratt draw on their experience of managing change in the Historic Royal Palaces to show that successful management techniques are timeless, simple and based on common sense. Looking back through history at great leaders and organisations they identify concepts, ideas and applications that have proved themselves over time. They then demonstrate how these techniques are currently being applied to run and secure the future of multi-million pound institutions such as the Tower of London, Hampton Court and Kensington Palace. With a compelling mix of historical lesson and modern application this is an essential read for anyone looking for the essence of good management

The Curious World of Samuel Pepys and John Evelyn Margaret Willes, 2017-09-19 An intimate portrait of two pivotal Restoration figures during one of the most dramatic periods of English history. Samuel Pepys and John Evelyn are two of the most celebrated English diarists. They were also extraordinary men and close friends. This first full portrait of that friendship transforms our understanding of their times. Pepys was earthy and shrewd while Evelyn was a genteel aesthete but both were drawn to intellectual pursuits. Brought together by their work to alleviate the plight of sailors caught up in the Dutch wars, they shared an inexhaustible curiosity for life and for the exotic. Willes explores their mutual interests: diary-keeping, science, travel and a love of books and their divergent enthusiasms: Pepys for theater and music, Evelyn for horticulture and garden design. Through the richly documented lives of two remarkable men, Willes revisits the history of London and of England in an age of regicide, revolution, fire and plague to reveal it also as a time of enthralling possibility

Versailles Mirrored Robert Wellington, 2025-09-04 Why has Louis XIV's Palace of Versailles defining symbol of hedonistic opulence in 17th century France and synonymous with the notion of the divine right of kings continued to shape the aesthetics of cultural capital in the centuries since his death? In *Versailles Mirrored* Robert Wellington tracks this enduring fascination with the Sun King's palace through eight case studies spanning the 17th to 21st centuries. The book demonstrates how the extravagant palace style began as a symbol of the state in the 17th century, how it was adopted by the nouveau riche to show off their financial success in the 19th century and remarkably how that palace look returned to play a role in statecraft in the hands of US President Donald Trump. Wellington

links the aristocratic architectural traditions of France England and Germany to North America through the lens of Versailles French architecture and the decorative arts Opening with a brief overview of the history of Versailles and the political and cultural motivations of its creation subsequent chapters address aristocratic buildings in France and Germany built by the Sun King s contemporaries historicism in the 19th century in Britain Germany and America and the present day with Trump s buildings and Chateau Louis XIV known as the world s most expensive home purchased by the Crown Prince of Saudi Arabia In uncovering the motivations of those patrons the book ultimately reveals why Versailles remains a powerful point of reference for those who wish to flaunt their social cultural and political capital **Handbook of Decision Making** Goktug

Morcol,2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories Common patterns in decision making styles are identified as well as the common variations that different contexts may generate The text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming It also explains alternative and emerging methods such as geographic information systems Q methodology and narrative policy analysis Practical applications are discussed using decision making practices in budgeting public administration and governance drug trafficking and information systems 'All manner of ingenuity and industry' Alastair

to medical science The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available **Reading Architectural History** Dana Arnold, 2003-09-02 Architectural history is more than just the study of buildings Architecture of the past and present remains an essential emblem of a distinctive social system and set of cultural values and as a result it has been the subject of study of a variety of disciplines But what is architectural history and how should we read it Reading Architectural History examines the historiographic and socio cultural implications of the mapping of British architectural history with particular reference to eighteenth and nineteenth century Britain Discursive essays consider a range of writings from biographical and social histories to visual surveys and guidebooks to examine the narrative structures of histories of architecture and their impact on perception and understanding of the architecture of the past Alongside this each chapter cites canonical histories juxtaposed with a range of social and cultural theorists to reveal that these writings are richer than we have perhaps recognised and that architectural production in this period can be interrogated in the same way as that from more recent past and can be read in a variety of ways The essays and texts combine to form an essential course reader for methods and critical approaches to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning **The Christian Monitors** Brent Sirota, 2014-01-28 This original and persuasive book examines the moral and religious revival led by the Church of England before and after the Glorious Revolution and shows how that revival laid the groundwork for a burgeoning civil society in Britain After outlining the Church of England's key role in the increase of voluntary charitable and religious societies Brent Sirota examines how these groups drove the modernization of Britain through such activities as settling immigrants throughout the empire founding charity schools distributing devotional literature and evangelizing and educating merchants seamen and slaves throughout the British empire all leading to what has been termed the age of benevolence *A History of Intelligence and 'Intellectual Disability'* C F Goodey, 2013-07-28 Starting with the hypothesis that not only human intelligence but also its antithesis intellectual disability are nothing more than historical contingencies C F Goodey's paradigm shifting study traces the rich interplay between labelled human types and the radically changing characteristics attributed to them From the twelfth century beginnings of European social administration to the onset of formal human science disciplines in the modern era *A History of Intelligence and Intellectual Disability* reconstructs the socio political and religious contexts of intellectual ability and disability and demonstrates how these concepts became part of psychology medicine and biology Goodey examines a wide array of classical late medieval and Renaissance texts from popular guides on conduct and behavior to medical treatises and from religious and philosophical works to poetry and drama Focusing especially on the period between the Protestant Reformation and 1700 Goodey challenges the accepted wisdom that would have us believe that intelligence and disability describe natural trans historical

realities Instead Goodey argues for a model that views intellectual disability and indeed the intellectually disabled person as recent cultural creations His book is destined to become a standard resource for scholars interested in the history of psychology and medicine the social origins of human self representation and current ethical debates about the genetics of intelligence *The Making of the English Gardener* Margaret Willes,2011-08-30 The people and publications at the root of a national obsession **The English Virtuoso** Craig Ashley Hanson,2009-05-15 This study aims to overturn 20th century criticism that cast the English virtuosi of the 17th and early 18th centuries as misguided dabblers arguing that they were erudite individuals with solid grounding in the classics deep appreciation for the arts and sincere curiosity about the natural world **1666** Rebecca Rideal,2016-10-18 1666 was a watershed year for England An outbreak of the Great Plague the eruption of the second Dutch War and the devastating Great Fire of London all struck the country in rapid succession and with devastating repercussions Shedding light on these dramatic events and their context historian Rebecca Rideal reveals an unprecedented period of terror and triumph Based in original archival research drawing on little known sources 1666 opens with the fiery destruction of London before taking readers on a thrilling journey through a crucial turning point in English history as seen through the eyes of an extraordinary cast of historical characters While the central events of this significant year were ones of devastation and defeat 1666 also offers a glimpse of the incredible scientific and artistic progress being made at that time from Isaac Newton s discovery of gravity to the establishment of The London Gazette It was in this year that John Milton completed *Paradise Lost* Frances Stewart posed for the iconic image of Britannia and a young architect named Christopher Wren proposed a plan for a new London a stone phoenix to rise from the charred ashes of the old city With flair and style 1666 exposes readers to a city and a country on the cusp of modernity and a series of events that altered the course of history Samuel Pepys, Isaac Newton, James Hodgson, and the Beginnings of Secondary School Mathematics Nerida F. Ellerton,M. A. (Ken) Clements,2017-03-02 This book tells one of the greatest stories in the history of school mathematics Two of the names in the title Samuel Pepys and Isaac Newton need no introduction and this book draws attention to their special contributions to the history of school mathematics According to Ellerton and Clements during the last quarter of the seventeenth century Pepys and Newton were key players in defining what school mathematics beyond arithmetic and elementary geometry might look like The scene at which most of the action occurred was Christ s Hospital which was a school ostensibly for the poor in central London The Royal Mathematical School RMS was established at Christ s Hospital in 1673 It was the less well known James Hodgson a fine mathematician and RMS master between 1709 and 1755 who demonstrated that topics such as logarithms plane and spherical trigonometry and the application of these to navigation might systematically and successfully be taught to 12 to 16 year old school children From a wider history of school education perspective this book tells how the world s first secondary school mathematics program was created and how slowly but surely what was being achieved at RMS began to influence school mathematics in other parts of Great Britain Europe and

America The book has been written from the perspective of the history of school mathematics Ellerton and Clements's analyses of pertinent literature and of archival data and their interpretations of those analyses have led them to conclude that RMS was the first major school in the world to teach mathematics beyond arithmetic on a systematic basis to students aged between 12 and 16 Throughout the book Ellerton and Clements examine issues through the lens of a long time theoretical perspective From a historiographical perspective this book emphasizes how the history of RMS can be portrayed in very different ways depending on the vantage point from which the history is written The authors write from the vantage point of international developments in school mathematics education and therefore their history of RMS differs from all other histories of RMS most of which were written from the perspective of the history of Christ's Hospital

Architects and Intellectual Culture in Post-Restoration England Matthew Walker, 2017-10-13 Architects Builders and Intellectual Culture in Restoration England charts the moment when well educated well resourced English intellectuals first became interested in classical architecture in substantial numbers This occurred after the Restoration of the Monarchy in 1660 and involved people such as John Evelyn Robert Hooke Sir Christopher Wren and Roger North Matthew Walker explores how these figures treated architecture as a subject of intellectual enquiry either as writers as designers of buildings or as both In four substantial chapters it looks at how the architect was defined as a major intellectual figure how architects acquired material that allowed them to define themselves as intellectually competent architects how intellectual writers in the period handled knowledge of ancient architecture in their writing and how the design process in architecture was conceived of in theoretical writing at the time In all Walker shows that the key to understanding English architectural culture at the time is to understand how architecture was handled as knowledge and how architects were conceived of as collectors and producers of such knowledge He also makes the claim that architecture was treated as an extremely serious and important area of intellectual enquiry the result of which was that by the turn of the eighteenth century architects and architectural writers could count themselves amongst England's intellectual and cultural elite
