Masterpieces in Detail Till-Holger Borchert, 2014-11-12 Forty works by early Netherlandish masters from van Eyck to Bosch reproduced in exquisite detail are the subject of this breathtaking book that leads readers deep into the paintings to reveal each artist's astonishing technique and brilliant application of color. The longer we gaze at the paintings of the old masters, the more we appreciate the subtlety and artistry of the painters who created them. This beautiful book offers readers an opportunity to learn and study the art of Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, Pieter Bruegel the Elder and many other masters of this period and region. It also explores their influence on later artists from the Baroque period. Each of the works is briefly presented along with its historical and contextual background and importance. Then in a series of full-page illustrations, specific details are enlarged to guide the reader carefully and thoughtfully through the piece's nuances and often overlooked features. The result is the next best thing to a private viewing at a museum: a truly sensuous and emotional experience that will engage both the novice and the expert. Till Holger Borchert's texts are informative and engaging as he shares his singular passion for these great works in a magnificent book that will inspire viewers to form their own opinions and exercise their own powers of observation within the context of this important period in art history.

Historical Dictionary of Renaissance Art Lilian H. Zirpolo, 2016-08-19 The art of the Renaissance is usually the most familiar to non-specialists and for good reason. This was the era that produced some of the icons of civilization including Leonardo da Vinci's *Mona Lisa* and *Last Supper* and Michelangelo's *Sistine Ceiling*. *Piet* and *David* marked as one of the greatest moments in history, the outburst of creativity of the era resulted in the most influential artistic revolution ever to have taken place. The period produced a substantial number of notable masters among them Donatello, Filippo Brunelleschi, Masaccio, Sandro Botticelli, Raphael, Titian and Tintoretto. This second edition of *Historical Dictionary of Renaissance Art* contains a chronology, an introduction and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on artists from Italy, Flanders, the Netherlands, Germany, Spain and Portugal, historical figures and events that impacted the production of Renaissance art. This book is an excellent access point for students, researchers and anyone wanting to know more about the Renaissance art.

Construction as Depicted in Western Art Michael Tutton, 2025-10-01 The Art of Building has captured the interest of artists from the Roman period to today. The process of construction appears in western art in all its details, trades and operations. Michael Tutton investigates the representation of building processes and materials through an examination of paintings, illuminated manuscripts, watercolours, prints, drawings and sculpture. Technical terms are explained and detailed interpretations of each work are provided with insights into the artists' inspiration and themes. Even paintings not wholly or principally devoted to construction sites may give tantalising glimpses of building activity. How do these images convey meaning? How much is imagined, how much is authentic? Fully referenced endnotes, bibliography and glossary complement the text and captions, informing not only the architectural and construction historian.
