Mathematics In A Postmodern Age A Christian Perspective:

Mathematics in a Postmodern Age Russell W. Howell, James Bradley, 2001 The discipline of mathematics has not been spared the sweeping critique of postmodernism Is mathematical theory true for all time or are mathematical constructs in fact fallible This fascinating book examines the tensions that have arisen between modern and postmodern views of mathematics explores alternative theories of mathematical truth explains why the issues are important and shows how a Christian perspective makes a difference Contributors W James Bradley William Dembski Russell W Howell Calvin Jongsma David Klanderman Christopher Menzel Glen VanBrummelen Scott VanderStoep Michael Veatch Paul Zwier *How Chinese Teach Mathematics: Perspectives From Insiders* Lianghuo Fan, Ngai-ying Wong, Jinfa Cai, Shiqi Li, 2015-03-13 This unique book represents another concerted research effort concerning Chinese mathematics education with contributions from the world's leading scholars and most active researchers The book presents the latest original research work with a particular focus on the teaching side of Chinese mathematics education to a wide international audience There are mainly three sections in the book The first section introduces readers to a historical and contemporary perspective respectively on traditional mathematical teaching in ancient China and on how modern Chinese mathematics teachers teach and pursue their pre service training and in service professional development The second section presents studies investigating a wide range of issues at both the macro and micro levels on how Chinese mathematics teachers teach mathematics The third section focuses on Chinese mathematics teachers investigating issues about their knowledge belief teacher training and professional development Like its predecessor *How Chinese Learn Mathematics Perspectives from Insiders* this book is a must for educational researchers practitioners and policy makers who are interested in knowing more about mathematics teaching teachers teacher education and professional development concerning Chinese teachers and learners *Christian Contours* Douglas S. Huffman, 2012-01-12 What does it mean to think and live Christianly in a world of competing worldviews *Christian Contours* answers this question by inviting readers to consider the understanding of reality proposed by the Bible Though it is easy to divide life into separate compartments religious and secular theological and practical faith invites us to view all of life in the light of that Biblical understanding Presenting a clear compelling case for unity in essential Christian tenets the authors of *Christian Contours* guide the reader through developing internalizing and articulating a biblical worldview This robust worldview enables the Christian to be a critically thinking participant in culture and to be a faithful disciple of Christ with both heart and mind **Faithful Learning and the Christian Scholarly Vocation** Douglas V. Henry, Bob R. Agee, 2003 Christian scholars and teachers everywhere are exploring ever more fully the relationship between Christian faith and the various academic disciplines In this book leading voices in the Christian academy provide a solid theological foundation for understanding the aims and practice of faith and learning integration especially within church related institutions and also discuss some major challenges and opportunities facing Christian higher education in the twenty first

century From publisher s description **Ideas at the Intersection of Mathematics, Philosophy, and Theology** Carlos R. Bovell,2012-09-17 How do mathematics philosophy and theology intersect In *Ideas at the Intersection of Mathematics Philosophy and Theology* Carlos Bovell proposes a wide range of possibilities In a series of eleven thought provoking essays the author explores such topics as the place of mathematics in the work of Husserl and Heidegger the importance of infinity for the Christian conception of God and the impact of G del s Theorem on the Westminster Confession of Faith This book will appeal to readers with backgrounds in mathematics philosophy and theology and can be used in core interdisciplinary modules that contain a math component *A Critical Examination of the Doctrine of Revelation in Evangelical Theology* Carisa A. Ash,2015-07-14 How God reveals himself is an important matter for Christians especially evangelicals For too long Carisa Ash contends evangelicals have rightly affirmed that God reveals through the created world but then they functionally neglect such revelation In this monograph Ash offers a corrective to this practice by presenting a theology of revelation that explores the commonalities between various forms of revelation world written and spoken word and Incarnate Word Particularly aimed at theologians interested in theological method Ash s study will also benefit people interested in faith and learning or interdisciplinary integration Ash argues that evangelicals must strive to align more closely their affirmations and their practice Her critique of current practices in theological method and integration along with the proposed theology of revelation are designed to help move the conversation forward *Redeeming Mathematics* Vern S. Poythress,2015-01-31 What does Christianity have to do with the study of mathematics Prolific writer and scholar Vern Poythress offers a startling answer to this perplexing question everything This groundbreaking book argues that the harmony of abstract mathematical truths the physical world of things and the personal world of our thinking depends on the existence of the Christian God With advanced degrees in mathematics and New Testament studies Poythress shows that these distinct perspectives on mathematics cohere because all three find their origin in God s consistent character and nature Whether it s simple addition and subtraction or more complex mathematical concepts such as set theory and the nature of infinity this comprehensive book lays a theistic foundation for all mathematical inquiry **Embracing Mathematics** Peter Appelbaum,with David Scott Allen,2008-06-30 This alternative textbook integrates pedagogy and content exploration in ways that are unique in mathematics education provoking new ideas for making mathematics education meaningful to teachers at all levels as well as their students Democracy and Mathematics Education Kurt Stenhagen,Catherine Henney,2021-05-06 In *Democracy and Mathematics Education* Kurt Stenhagen and Catherine Henney develop a way of thinking about the nature and purposes of math that is inclusive participatory and thoroughly human They use these ideas to create a school mathematics experience that can enhance students math abilities and democratic potential They locate mathematics origins in human activity and highlight the rich but often overlooked links between mathematical activity and democratic social practices Democratic mathematics education foregrounds student inquiry and brings to light the moral dimensions of a discipline that has both

remarkable utility and inevitable limitations For math educators the book's humanities approach helps to see the subject anew For philosophers it provides an important real world context for wrestling with perennial and timely questions engaging democratic and evolutionary theory to transform school math This alternative approach to mathematics and mathematics education provides a guide for how to use math to make democracy a larger part of school and wider social life

Eckel,2003 The audience for this book is twofold 1 teacher programs in colleges that are training the next generation of Christian school teachers and 2 instructors already practicing their vocation in the Christian academy The present volume seeks to wed the philosophy of biblical integration with the practice of biblical integration Biblical integration is hard work Therefore many concrete examples will be used to facilitate understanding of the ideas **Christian Higher Education**

David S. Dockery,Christopher W. Morgan,2018-12-10 Our world is growing increasingly complex and confused a unique and urgent context that calls for a grounded and fresh approach to Christian higher education Christian higher education involves a distinctive way of thinking about teaching learning scholarship curriculum student life administration and governance that is rooted in the historic Christian faith In this volume twenty nine experts from a variety of fields including theology the humanities science mathematics social science philosophy the arts and professional programs explore how the foundational beliefs of Christianity influence higher education and its disciplines Aimed at equipping the next generation to better engage the shifting cultural context this book calls students professors trustees administrators and church leaders to a renewed commitment to the distinctive work of Christian higher education for the good of the society the good of the church and the glory of God **Critical Race Theory and the American Justice System** Paul Zwier,2023-02-27 When a trial

lawyer stands before a jury to argue a case about a Black victim killed by a white person how should the lawyer best argue the case Critical race theorists CRTs are pessimistic that a white jury can set aside its own racism in judging the Black victims actions and are skeptical of a jury s ability to fairly judge a white actor s motives Before the George Floyd and Ahmaud Arbery killings there was strong evidence The Innocence Project that the CRTs were right After all the prosecutors in the Ahmaud Arbery case were so convinced that a white jury in a Georgia county would not convict white vigilantes that they initially didn t even charge the killers with a crime However then back to back in both cases prosecutors prosecuted and the jury returned guilty verdicts They convicted Derrick Chauvin of murder They convicted Travis and Gregory McMichael and Roddie William Bryant of murder This book examines the how and why of these verdicts and asks whether they hold lessons vital to withstanding CRT challenges to the American justice system

Abraham's Dice Karl Giberson, 2016 Most of us believe everything happens for a reason Whether it is God s will karma or fate we want to believe that nothing in the world especially disasters and tragedies is a random meaningless event But now as never before confident scientific assertions that the world embodies a profound contingency are challenging theological claims that God acts providentially in the world The random and meandering path of evolution is widely used as an argument that God did not create life Abraham s Dice explores the interplay between chance and providence in the monotheistic religious traditions looking at how their interaction has been conceptualized as our understanding of the workings of nature has changed This lively historical conversation has generated intense ongoing theological debates and provocative responses from science what are we to make of the history of our universe where chance and law have played out in complex ways Or the evolution of life where random mutations have challenged attempts to find purpose within evolution and convinced many that human beings are but a glorious accident The enduring belief that everything happens for a reason is examined through a conversation with major scholars among them holders of prestigious chairs at Oxford and Cambridge Universities and the University of Basel as well as several Gifford lecturers and two Templeton prize winners Organized historically Abraham s Dice provides a wide ranging scientific theological and biblical foundation to address the question of providence and divine action in a world shot through with contingency

Critical Race Theory and the Struggle at the Heart of Legal Education Paul Zwier, 2023-09-21 This book is an examination of the reception of critical race theory CRT in America s legal education system Critical race theory has been roiling legal education since the aftermath of Obama s presidency The killings of unarmed Black people fueled Black Lives Matter BLM protests in law schools which created a sense of urgency behind the plea for the law to do more to stop the killings of unarmed Black people Some BLM led protests called for faculty and administrators to be fired if they didn t act There has been an upsurge of states legislating against the teaching of CRT and law schools are struggling to respond How should legal education view CRT What are the neutral unifying values in the law that offer hope in the fight to alleviate the wave of racism that seems to continually batter law schools and society as a whole This book looks for answers

and encourages the recommittal to the foundationalist beliefs of free speech equality and the due process of law **God's Providence and Randomness in Nature** Robert John Russell, Joshua M. Moritz, 2019-02-11 In October 2014 a group of mathematicians physicists ecologists philosophers and theologians gathered at a special conference in Berkeley California to present the results of a two year research program dubbed Project SATURN This program explored many rich avenues of thought at the intersection of modern science and Christian theology Chief among them is the possibility that specific processes might be so complex that they do not have sufficient physical causes Known as ontological indeterminism this idea has profound implications for theology Specifically it allows God to be thought of as acting providentially within nature without violating the laws and processes of nature Such a momentous insight could influence how we understand free will natural evil suffering in nature and the relation between divine providence and human evolution The essays collected here discussed these topics and were initially presented at the 2014 conference Part I establishes the scientific basis for conceptualizing specific processes in the universe as inherently random and possibly indeterministic Part II discusses the philosophical and theological issues that spring from this understanding Together they represent the cutting edge of thought in the increasingly productive dialogue between science and theology Short for the Scientific and Theological Understandings of Randomness in Nature Project SATURN was created by the Center for Theology and the Natural Sciences a Program of the Graduate Theological Union Berkeley It was funded with a grant administered by Calvin College and provided by the John Templeton Foundation Faith Reads David Rainey, 2008-07-30 At last a resource for librarians who wish to build or develop their nonfiction collection and use it to better serve the needs of adult Christian readers Covering the three major branches of Christianity Roman Catholic Protestant and Orthodox the author organizes more than 600 titles into subject categories ranging from biography the arts and education to theology devotion and spiritual warfare Award winning classics are noted Introductory narrative frames the literature and helps librarians better understand Christian literature and learn how to establish selection criteria for building a Christian nonfiction collection *Where Wisdom May Be Found* Edward P. Meadors, 2019-08-29 All Christian colleges and universities hail the integration of faith and learning as a premier mission objective There is less agreement as to what the integration of faith and learning should look like in pedagogical and cross disciplinary terms This volume proposes that faith and learning are interrelated from the start Discovery of truth within the academic disciplines cultivates discipline specific wisdom that both accords with all reality and complements the whole counsel of God *Where Wisdom May Be Found* brings together a faculty of twenty seven accomplished voices from across curricula to celebrate each field s capacity for revealing wisdom from all corners of God s creative design In synthesis these voices declare the depth and richness of the wisdom and knowledge of God for the educational advancement and holistic equipping of the corporate people of God *Faith, Freedom, and Higher Education* P.
