Matemáticas, 1 Primaria, 2015 **Neuroeducación. Ayudando a aprender desde las evidencias científicas** Ana Rosa Bodoque-Osma, Sixto González-Víllora, 2021-06-02 La historia de la humanidad está ligada a la presencia del hecho educativo la transmisión de conocimiento la importancia de la mejora en los saberes y el aprendizaje de valores prosociales En paralelo la fascinación del estudio del sistema nervioso y en términos coloquiales el cerebro como su órgano más citado ha estado presente desde los primeros escritos No es extraño que desde hace unas décadas las inquietudes y motivaciones científicas de muchos investigadores y profesores en materia educativa hayan buscado un puente entre Neurociencia y Educación Un camino entre el órgano que aprende y enseña al mismo tiempo y las aplicaciones prácticas de lo investigado como impulso para el proceso de enseñanza aprendizaje Este encuentro ha dado paso a la disciplina académica emergente de la Neuroeducación Una propuesta que requiere de base científica pero también de un espacio de aplicación real necesita al colegio al instituto busca aulas y a los estudiantes Es imprescindible reconocer la necesidad de investigación aplicada y con

un sentido ecológico pero además se precisa la implicación del profesorado de todos los niveles para el avance correcto del complejo mecanismo que facilita la Neuroeducación. Por tanto se está ante una conversación que ha de ser obligatoriamente bidireccional: investigadores docentes a pie de aula. O dicho de otra manera: acercar la universidad a los centros escolares y los centros escolares a la universidad. Los diez capítulos que componen este libro recogen la necesidad de abordar la interdisciplinariedad que caracteriza a la Educación reuniendo la investigación científica con el espacio apropiado para aplicar los resultados: las aulas. Psicología, Educación Física, Comunicación y Lenguaje, Neurodesarrollo o Matemáticas entre otras áreas presentes en cada una de las instituciones educativas para las que la Neuroeducación plantea opciones pedagógicas interesantes que parten de la investigación con rigor científico. Desde las dificultades de aprendizaje hasta las prácticas actuales y reales que están sucediendo en la escuela, la propuesta de esta obra con el título Neuroeducación ayudando a aprender desde las evidencias científicas ofrece una panorámica interesante para los estudiantes del Grado en Maestro, otros Grados y Másteres con orientación educativa para docentes en activo y para investigadores que quieran plantearse la Neuroeducación como reto: seguir aprendiendo y mejorando cada día.

Este libro destaca la importancia de escuchar las inquietudes y expectativas del alumnado con respecto al aprendizaje de las Matemáticas a través de la escritura de cartas destinadas a ellas como si se tratara de alguien con quien se sinceran. A partir de sus experiencias compartidas se trabaja en el aula la identidad matemática de cada estudiante, la forma en que las personas se perciben a sí mismas como matemáticas y qué relaciones establecen entre sí para aprender juntas. Su propósito es acompañar a los docentes en la difícil e interesante tarea de proporcionar un ambiente de aprendizaje cálido y atractivo en el que los estudiantes puedan acercarse a las Matemáticas con soltura, curiosidad y confianza en sus propias capacidades. *Matemáticas, 1 Primaria*, 2016
