Mayer,Paul E. Peterson,2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree

about what the money spent on education really buys. In particular they do not agree on how much education improves children's ability to learn or whether the things children learn in school truly improve their chances for success as adults. If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning. The essays in this book report estimates of the effects of learning on earnings and other life outcomes. They also examine whether particular aspects of schooling such as the age at which children begin school, classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning. Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established. But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice. Contributors include John Bishop, Eric Hanushek, James Heckman, Christopher Jencks, Caroline Minter Hoxby, Fred Mosteller and Christopher Winship.

Fortune Knox Once Jack Knox, 2022-11-02 Victoria's favourite humourist returns with a hilarious collection of observations on Island living. For more than twenty five years Jack Knox's weekly humour column has captured the essence of life in BC's picturesque capital city. A Dysfunction by the Sea. In *Fortune Knox Once* as in his previous humour collections Knox gathers together his favourite *Time* Colonist pieces that best sum up the absurdity of our times. The subject matter is all over the map: the lost art of handwriting, the sexiness of the Canadian accent, phone addiction, the Rogue Cow of Metchosin, ugly trucks, ugly people, a parody of end of school announcements and a letter to Prince Harry. The chapter on Pi Day is some of the best math based humour you will read all week. And while there are a dozen pieces on plague related topics from dog shortage to doomscrolling to the time Knox dropped his credit card into the saltchuck, COVID appears only in brief glimpses like a moustache twirling villain occasionally creeping onto the stage in an old style British pantomime. Whether you are a born and bred Islander who thinks this is all completely normal or a Mainland transplant lured by the myth of lower housing prices *Fortune Knox Once* is the laugh we all need right now.

Unschooling To University Judy L. Arnall, 2018-09-21 School is one option for education, homeschooling is the second and unschooling is the third. Many parents are frustrated by the school system perhaps because of bullying, crowded classrooms and outdated, dull online courses. Disengaged learners that have no say in their coerced curriculum tend to act out, tune out or drop out. Education must change and unschooling is the fastest growing alternative method of learning. Two decades ago students registered with their local school based on their house address. Now with the internet students are borderless. Learning can occur anywhere, anytime, anyway and from anyone, including self-taught. Self-directing their education, unschoolers learn through Play, Projects, Reading, Volunteering, Video games, Sports, Mentorship, Travel, Life. This book explores the path of 30 unschooled children who self-directed all or part of their education and were accepted by universities, colleges and other postsecondary schools. Most have already graduated. What children need most are close relationships: parents, teachers, siblings, relatives, coaches and mentors.

within a wider community not just within an institutional school Educational content is everywhere Caring relationships are not Families that embrace unschooling do not have to choose between a quality education and a relaxed connected family lifestyle They can have both

Gender Fairness in Today's School Jim Dueck,2017-09-15 This book traces back how male students are currently disadvantaged in school by instruction in an overwhelmingly female environment devoid of male role models who can inspire the love of learning in male students Further teachers are unduly influenced by biases related to compliant behaviors which result in conflating assessments of student academic achievement with compliance Therefore males marks prevent to many from qualifying for courses leading to leading as well as achieving sufficiently high marks in those courses
