

III. Introduction

Background of the Study

Mathematics is considered as one of the most important learning module in school for it is very useful specially in our daily life. Though it is considered as a difficult subject because it deals with numbers, every person must have a chance to gain more knowledge about mathematics to enhance its analysis, problem-solving ability and reasoning.

Mathematics is essential to our world, so its knowledge is transferable to many situations. Engineering, Science, and Technology contribute to great inventions in the world, with all experts in all those fields having outstanding math skills. The importance of mathematics is not only crucial for scientists or engineers, but it helps develop skills, such as analyzing data, seeking evidence, recognizing patterns every day. It gives a chance to people have a better way of understanding or interpreting information (EduBerdie.com, 2020). All Students have different learning styles and need to have techniques that will help improve all styles of learning to get the best results. For a student in this generation, living can be a mystery, but math provides wonderful solutions to all problems.

Combination is a branch of mathematics that may sound a bit intimidating, but in fact, is just a fancy name for counting techniques. Combination can be used to combine objects using rules to create new arrangements of those objects, count the number of arrangements that can be made from a group of objects, and find the best arrangement of objects given different circumstances (2003-2020 Study.com). But If we will be dealing larger numbers, fundamental counting principles and rules can be complicated and it will take a longer time to get the answer.

To improve and explore the students understanding about mathematics is through using a strategy which is a shortcut technique to solve a specific problem in an easy way and less time consuming. The topic combination is applicable to be tackled in Mathematics 10 during the third quarter of the school year. Where students should properly know how to find the
