A Diversity of Pathways Through Science Education Yann Shiou Ong, Timothy Ter Ming Tan, Yew-Jin Lee, 2024-06-18 This book presents the work of academics who contributed their work at the International Science Education Conference ISEC 2021 in alignment with the conference theme 2020 Vision for Science Education Research Collectively the chapters aim to evoke intellectual dialogues on current and future trends in science education It features chapters that are grouped thematically into three sections Questions and Questioning in Science STEM education Developing Science Teaching and Assessment and History Philosophy and Sociology of Science Engineering and Informal Learning Through the various sections the book presents empirical studies in science and engineering classrooms or laboratories puts forward a framework for problem based learning provides an account of a prominent scientist's efforts in promoting practical science through analysis of historical documents and uncovers trends in informal science learning space research through a review of literature Each section is introduced by a commentary with further insights and thought provoking questions on ideas raised in the chapters The book also includes a Notes to Our Future Colleagues section in each chapter which presents readers with a collective vision for the state of science education research in the year 2050

Optimizing Player Health, Recovery, and Performance in Basketball, volume II Davide Ferioli, Aaron T. Scanlan, Daniele Conte, 2025-03-19 This Research Topic is the second volume of the article collection Optimizing Player Health Recovery and Performance in Basketball Please see the first volume here In line with the first volume basketball is a popular team sport played all over the world by male and female players participating in various competitions As the game continues to evolve there are new challenges and opportunities being faced by teams Consequently basketball organizations constantly seek competitive advantages that optimize the health recovery and performance of players through various practices The growing body of basketball research provides an essential evidence base for basketball organizations to draw upon when implementing different practices As such it is important that sound basketball research with strong practical translation is produced on topics relevant to player health recovery and performance In this regard examination of coaching training testing monitoring nutrition recovery injury

prevention psychological performance analysis and sleep strategies as well as technological innovations that can improve the existing understanding and practices in basketball would prove advantageous for basketball coaches high performance staff and players alike

Essentials of Tropical Combinatorics Michael Joswig, 2021-12-08 The goal of this book is to explain at the graduate student level connections between tropical geometry and optimization Building bridges between these two subject areas is fruitful in two ways Through tropical geometry optimization algorithms become applicable to questions in algebraic geometry Conversely looking at topics in optimization through the tropical geometry lens adds an additional layer of structure The author covers contemporary research topics that are relevant for applications such as phylogenetics neural networks combinatorial auctions game theory and computational complexity This self contained book grew out of several courses given at Technische Universität Berlin and elsewhere and the main prerequisite for the reader is a basic knowledge in polytope theory It contains a good number of exercises many examples beautiful figures as well as explicit tools for computations using texttt polymake

Computational Mathematics,

Nanoelectronics, and Astrophysics Shaibal Mukherjee, Abhirup Datta, Santanu Manna, Swadesh Kumar Sahoo, 2021-03-23 This book is a collection of original papers presented at the International Conference on Computational Mathematics in Nanoelectronics and Astrophysics CMNA 2018 held at the Indian Institute of Technology Indore India from 1 to 3 November 2018. It aims at presenting recent developments of computational mathematics in nanoelectronics, astrophysics, and related areas of space sciences and engineering. These proceedings discuss the most advanced innovations, trends, and real-world challenges encountered and their solutions with the application of computational mathematics in nanoelectronics, astrophysics, and space sciences. From focusing on nano-enhanced smart technological developments to the research contributions of premier institutes in India and abroad on ISRO's future space explorations, this book includes topics from highly interdisciplinary areas of research. The book is of interest to researchers, students, and practising engineers working in diverse areas of science and engineering, ranging from applied and computational mathematics to nanoelectronics, nanofabrications, and astrophysics.

Proceedings of 4th International Conference on Mathematical Modeling and Computational Science Souvik Pal, Álvaro Rocha, 2025-06-21 This book aims to capture the interest of researchers and professionals in information technology, computer science, and mathematics. It covers fundamental and advanced concepts related to intelligent computing paradigms, data sciences, graph theory, and mathematical modeling. In high-performance computing, the need for intelligent adaptive computing mechanisms and the integration of mathematical modeling in computational algorithms is becoming increasingly significant. Serving as a valuable resource for industry professionals, this book also supports beginners in gaining insights into enhanced computing paradigms and mathematical concepts from foundational to advanced levels. Our objective is to provide a platform for researchers, engineers, academicians, and industry experts worldwide to share their findings on emerging trends. The authors believe this book not only presents innovative ideas but also fosters engaging discussions and inspires new perspectives.

Maple in Mathematics Education and Research Jürgen Gerhard, Ilias Kotsireas, 2020-02-27 This book constitutes the refereed proceedings of the third Maple Conference MC 2019 held in Waterloo, Ontario, Canada, in October 2019. The 21 revised full papers and 9 short papers were carefully reviewed and selected out of 37 submissions; one invited paper is also presented in the volume. The papers included in this book cover topics in education, algorithms, and applications of the mathematical software Maple.

Cybernetics and Mathematics Applications in Intelligent Systems Radek Silhavy, Roman Senkerik, Zuzana Kominkova, Oplatkova, Zdenka Prokopova, Petr Silhavy, 2017-04-07 This book presents new methods for and approaches to real-world problems as well as exploratory research describing novel mathematics and cybernetics applications in intelligent systems. It focuses on modern trends in selected fields of technological systems and automation control theory. It also introduces new algorithms, methods, and applications of intelligent systems in automation, technological, and industrial applications. This book constitutes the refereed proceedings of the Cybernetics and Mathematics Applications in Intelligent Systems Section of the 6th Computer

Christian Berger-Vachon,Anna María Gil Lafuente,Janusz Kacprzyk,Yuriy Kondratenko,José M. Merigó,Carlo Francesco Morabito,2017-10-31 This book presents an authoritative collection of contributions reporting on fuzzy logic and decision theory together with applications and case studies in economics and management science Dedicated to Professor Jaume Gil Aluja in recognition of his pioneering work the book reports on theories methods and new challenges thus offering not only a timely reference guide but also a source of new ideas and inspirations for graduate students and researchers alike

Davenport-Zannier Polynomials and Dessins d'Enfants Nikolai M. Adrianov,Fedor Pakovich,Alexander K. Zvonkin,2020-06-29 The French expression dessins d'enfants means children's drawings This term was coined by the great French mathematician Alexandre Grothendieck in order to denominate a method of pictorial representation of some highly interesting classes of polynomials and rational functions The polynomials studied in this book take their origin in number theory The authors show how by drawing simple pictures one can prove some long standing conjectures and formulate new ones The theory presented here touches upon many different fields of mathematics The major part of the book is quite elementary and is easily accessible to an undergraduate student The less elementary parts such as Galois theory or group representations and their characters would need a more profound knowledge of mathematics The reader may either take the basic facts of these theories for granted or use our book as a motivation and a first approach to these subjects

positive innovations in the development of the region It is also a significant point of reference for academicians and students This collection of selected social sciences papers is based on the theme Soaring Towards Research Excellence presented at the Regional Conference of Sciences Technology and Social Sciences RCSTSS 2016 organised bi annually by Universiti Teknologi MARA Cawangan Pahang Malaysia **Algebraic Curves and Their Applications** Lubjana Beshaj, Tony

Shaska, 2019-02-26 This volume contains a collection of papers on algebraic curves and their applications While algebraic curves traditionally have provided a path toward modern algebraic geometry they also provide many applications in number theory computer security and cryptography coding theory differential equations and more Papers cover topics such as the rational torsion points of elliptic curves arithmetic statistics in the moduli space of curves combinatorial descriptions of semistable hyperelliptic curves over local fields heights on weighted projective spaces automorphism groups of curves hyperelliptic curves dessins d'enfants applications to Painlevé equations descent on real algebraic varieties quadratic residue codes based on hyperelliptic curves and Abelian varieties and cryptography This book will be a valuable resource for people interested in algebraic curves and their connections to other branches of mathematics Mathematical Aspects of Computer and Information Sciences Johannes Blömer, Ilias S. Kotsireas, Temur Kutsia, Dimitris E. Simos, 2017-12-20 This book constitutes the refereed proceedings of the 7th International Conference on Mathematical Aspects of Computer and Information Sciences MACIS 2017 held in Vienna Austria in November 2017 The 28 revised papers and 8 short papers presented were carefully reviewed and selected from 67 submissions The papers are organized in the following topical sections foundation of algorithms in mathematics engineering and scientific computation combinatorics and codes in computer science data modeling and analysis and mathematical aspects of information security and cryptography

Invitation to Nonlinear Algebra Mateusz Michałek, Bernd Sturmfels, 2021-03-05 Nonlinear algebra provides modern mathematical tools to address challenges arising in the sciences and engineering It is useful everywhere where polynomials appear in particular data and computational sciences statistics physics optimization The book offers an invitation to this broad and fast developing area It is not an extensive encyclopedia of known results but rather a first introduction to the subject allowing the reader to enter into more advanced topics It was designed as the next step after linear algebra and well before abstract algebraic geometry The book presents both classical topics like the Nullstellensatz and primary decomposition and more modern ones like tropical geometry and semidefinite programming The focus lies on interactions and applications Each of the thirteen chapters introduces fundamental concepts The book may be used for a one semester course and the over 200 exercises will help the readers to deepen their understanding of the subject
