Differentiating Instruction for Gifted Learners Christine L. Weber, Wendy A. Behrens, Cecelia Boswell, 2021-09-03

Differentiating Instruction for Gifted Learners allows educators and stakeholders to examine issues related to differentiating curriculum and instruction in a variety of contexts. The case studies in this rich resource analyze various differentiation strategies and their benefits to promote classrooms where every student belongs, every student is valued, and every student is nurtured. The cases facilitate conversations about children and their unique needs by situating learning in authentic and meaningful contexts with the goal of helping educators improve services and programs for gifted and talented students. Things to Consider guide the reader's thinking without imparting an explicit action recommendation or solution. Discussion questions, activities, extensions, and suggestions for additional readings support the standards of excellence set forth in the revised NAGC CEC Teacher Preparation Standards in Gifted and Talented Education and the NAGC CEC Advanced Standards in Gifted Education Teacher Preparation.

Math Sense Christine Moynihan, 2012. How is that you can walk into a classroom and gain an overall sense of the quality of math instruction taking place there? What contributes to getting that sense? In Math Sense, author Christine Moynihan explores some of the components that comprise the look, sound, and feel of effective teaching and learning. Does the landscape of the classroom feature such items as student work samples, a math literature collection, and a number line? Do the lessons include wait time, checks for understanding, and written feedback? Do you feel a spirit of collaboration, risk taking, and a sense of pride? In Math Sense, Moynihan provides a series of self-assessment rubrics to help you identify the earmarks of a vibrant mathematics community that will help inform and refine your practice. This practical guide offers a road map for taking stock of your teaching and building a stronger mathematics classroom environment for you and your students.

Enriching Your Math Curriculum Lainie Schuster, 2010. Presents practices and routines designed to support and nourish teachers as they prepare and present a meaningful year of mathematics instruction for fifth-grade mathematicians. Offers activities, lessons, and narration that can be easily adapted or adjusted to fit the particular needs of the students or the requirements of a prescribed curriculum.

Differentiating Instruction With Menus for the Inclusive Classroom Laurie E. Westphal, 2021-09-03. Differentiating Instruction With Menus for the Inclusive Classroom Math for grades 3-5 offers teachers everything they need to create a student-centered learning environment based on choice. This book provides five different types of menus that students can use to select exciting products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format. Topics addressed include whole numbers and operations, fractions, probability and statistics, geometry, and measurement. Differentiating Instruction With Menus for the Inclusive Classroom Math provides numerous types of leveled menus that lower and on-level elementary-aged students can use to demonstrate learning through a method of their choice. Menus with similar formats but geared towards varying ability levels allow teachers to differentiate easily.
