Mathematics Of Curved Mirrors:

Blueprints Marcus du Sautoy,2025-09-09 A stunning book a thrilling read Peter Frankopan that reveals how creative people can harness the profound and productive relationship between mathematics and the arts When Shakespeare has the Three Witches cast Macbeth s lot he uses something very weird to do it not simply eye of newt and toe of frog but the number seven And when Hamlet claims To be or not to be that is the question Shakespeare reaches for eleven For Shakespeare prime numbers were magical And he is not alone As Marcus du Sautoy showcases in Blueprints creativity is inseparable from mathematics The designs of Le Corbusier and Leonardo the music of Glass Bach and Debussy the wild visions of Dali the choreography of Laban the animation of Pixar all are shot through with mathematics from primes and fractals to the weirder worlds of Hamiltonian cycles and hyperbolic geometry And Du Sautoy argues that the relationship runs both ways Just as mathematics inspires new art the artistic mindset is a necessity for discovering new mathematics Blueprints will expand your mind but more importantly it shows how to ignite your imagination Anyone who wants to create needs this book   An Interactive Multimedia Introduction to Signal Processing Ulrich Karrenberg,2013-11-11 This innovative book and CD ROM learning system offers students and teachers a hands on interactive tool that makes the concepts and tools of modern computer based signal processing immediately understandable Built around interactive software DASYLab and supported by 240 illustrations Karrenberg s self tutorial emphasizes the underlying principles of signals and systems while avoiding mathematical models and equations This approach makes the material more accessible to readers who may lack mathematical and programming sophistication yet need to use or instruct others in the skills The CD contains all programs videos manuals and the complete text The S version of DASYLab for Windows provides an interactive development environment for the graphic programming of signal processing systems and more generally microelectronics systems Through active links block diagrams a pc sound card and a microphone users perform signal processing of real signals attaining a visceral knowledge of the concepts and methods More than 200 pre programmed systems and transparencies are included Interactive Multimedia Introduction to Signal Processing has been awarded a prestigious digita2002 award Digita awards are one of the most important multimedia prizes in Germany s educational market They are awarded annually to the best educational software in various categories   Geometry in History S. G. Dani,Athanase Papadopoulos,2019-10-18 This is a collection of surveys on important mathematical ideas their origin their evolution and their impact in current research The authors are mathematicians who are leading experts in their fields The book is addressed to all mathematicians from undergraduate students to senior researchers regardless of the specialty
