International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society **Zimbabwe Books in Print** ,1993 **International Journal of Educational Management and Development Studies** Patricia Sonia Elardo-Zabala,Maricon V. Magsino Jr.,2021-06-30 International Journal of Educational Management and Development Studies IJEMDS is an open access refereed journal focused on educational leadership educational management teaching and learning across all disciplines and levels internationalization of education transnational education and societal issues on educational development The field of education has been continuously evolving as influenced by its nature and the societal factors As the journal celebrates the very dynamic and complex nature of education it provides educators and researchers a platform for their research findings This allows researchers to apply multiple designs to describe analyze and evaluate the history current issues and the future direction of education in regional and international contexts **Education in the New Zimbabwe** ,1988 Resources in Education ,1992-12 *Mapping research and innovation in the Republic of Zimbabwe* Lemarchand, Guillermo A.,Schneegans, Susan,2014-08-11

Education and Development in Zimbabwe Edward Shizha,Michael T. Kariwo,2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe It challenges scholars to think about the role of education its funding and the egalitarian approach to widening access to education The nexus between education democracy and policy change is a complex one The book provides an illuminating account of the

constantly evolving notions of national identity language and citizenship from the Zimbabwean experience The book discusses educational successes and challenges by examining the ideological effects of social political and economic considerations on Zimbabwe s colonial and postcolonial education Currently literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe This book is likely to be one of the first on the impact of social political and economic meltdown on education The book is targeted at local and international academics and scholars of history of education and comparative education scholars of international education and development undergraduate and graduate students and professors who are interested in educational development in Africa particularly Zimbabwe Notwithstanding the book is a valuable resource to policy makers educational administrators and researchers and the wider community Shizha and Kariwo s book is an important and illuminating addition on the effects of social political and economic trajectories on education and development in Zimbabwe It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture The book offers new insights that may be useful for an understanding of not only the Zimbabwean case but also education in other African countries Rosemary Gordon Senior Lecturer in Educational Foundations University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist universal elementary education to the disarray of contemporary socioeconomic crisis covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching this text provides a comprehensive wide ranging and yet carefully detailed account of education in Zimbabwe This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe s education specifically but more widely to all who are interested in how the sociopolitical shapes education how ideology policy international pressures economic factors and shifts in values collectively forge the historical and contemporary character of a country s education Handel Kashope Wright Professor of Education University of British Columbia

Beyond the Crises: Zimbabwe's Prospects for Transformation Tendai Murisa, Tendai Chikweche, 2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier These transformations have necessitated the call for the restructuring of Zimbabwean society polity and economy But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications Beyond the Crises Zimbabwe's Prospects for Transformation is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions By focusing on different aspects of social and economic justice Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans

Education Reform and the Learning Crisis in Developing Countries Prema Clarke, 2022-09-15 Over three decades ago international donors declared that there was a learning crisis in developing countries In the years since large investments have been made towards education yet there has been an apparent relative lack of progress in student learning This book unpicks this disparity and explores the implications of evidence based donor programming for quality education It undertakes an in depth analysis of the interventions financed by the main donors in primary education such as infrastructure development provision of instructional material teacher training and community mobilization and argues that the research undertaken during this period was unable to provide answers The author outlines an alternative model for evidence generation that can assist in the design of relevant and targeted interventions for learning to ultimately inform and improve future education programmes Timely and radical this book is essential reading for researchers and students in the fields of education research and education reform

Recruiting, Retaining, and Retraining Secondary School Teachers and Principals in Sub-Saharan Africa, 2007-01-01 This working paper is based on country case studies of Ethiopia Ghana Guinea Madagascar Tanzania and

Uganda and an extensive literature review In many parts of Africa the demand for secondary teachers substantially exceeds the supply due to factors such as secondary teacher attrition bottlenecks in the teacher preparation system and perceived unattractive conditions of service Few countries have strong policies strategies and programs for recruiting able secondary school graduates to secondary teaching The paper suggests several critical and promising areas for improvement in th
