Spent Geoffrey Miller, 2009-05-14 A leading evolutionary psychologist probes the hidden instincts behind our working shopping and spending Evolutionary psychology the compelling science of human nature has clarified the prehistoric origins of human behavior and influenced many fields ranging from economics to personal relationships In Spent Geoffrey Miller applies this revolutionary science's principles to a new domain the sensual wonderland of marketing and status seeking that we call American consumer culture Starting with the basic notion that the goods and services we buy unconsciously advertise our biological potential as mates and friends Miller examines the hidden factors that dictate our choices in everything from lipstick to cars from the magazines

we read to the music we listen to With humor and insight Miller analyzes an array of product choices and deciphers what our decisions say about ourselves giving us access to a new way of understanding and improving our behaviors Like Freakonomics or The Tipping Point Spent is a bold and revelatory book that illuminates the unseen logic behind the chaos of consumerism and suggests new ways we can become happier consumers and more responsible citizens Dating - Philosophy for Everyone Kristie Miller, Marlene Clark, 2011-05-09 DATING PHILOSOPHY FOR EVERYONE Speed dating online dating group blind dating dating consultants A booming dating industry is catering to an ever increasing number of single adults in the twenty first century with the market for a mate now pulling in more than a billion dollars a year in the United States So how do we successfully attempt to navigate the dating minefield Progressing from the first flirtatious moment of eye contact to the selection of a mate Dating Philosophy for Everyone includes a number of playful yet relevant essays for anyone who has dated is dating or intends to date again It offers fascinating philosophical explorations of topics such as The taboos of dating and how to play the dating game Should science teach men how to attract women The problem of having too much choice The vicissitudes of dating and mating are explored from a number of perspectives all of which will help demystify coupling in the twenty first century for those young daters just entering the fray and those veterans returning to the game *Psychology Around Us* Ronald Comer, Elizabeth Gould, 2010-01-19 This exciting new textbook for introductory psychology helps to open students minds to the idea that psychology is all around us Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it and open them up to an appreciation of psychology outside of the classroom Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science Almost every chapter within this first edition helps open students minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life This text highlights human development brain function abnormal psychology and the individual differences in each area as cut across themes to demonstrate these connections Also included are two page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza study psychology or listen to music The art featured in these spreads have been created especially for Psychology Around Us by an award winning artist with input from faculty on how it will contribute to teaching and learning Features Cut Across Connections Almost every chapter helps students comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life What Happens in the Brain When These two page art spreads demonstrate exactly what happens in the brain when we engage in everyday activities such as eating pizza studying psychology or listening to music Chapter Opening Vignettes Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behaviour This theme is reinforced throughout the chapter celebrating the extraordinary processes that make the everyday possible Special topics on

psychology around us Each chapter highlights interesting news stories current controversies in psychology and relevant research findings that demonstrate psychology around us The Practically Speaking box emphasizes the practical application of everyday psychology Helpful study tools Key Terms Marginal Definitions Marginal Notes Chapter Summaries *The Darwin Awards Countdown to Extinction* Wendy Northcutt, 2010-10-28 The hilarious New York Times bestselling phenomenon and the perfect funny gift The Darwin Awards are more than just a brand They're a pop culture phenomenon With six books and a website that draws in more than a million unique visitors every month the Darwin Awards rivals The Onion and The Simpsons as one of the biggest humor franchises in the world Fully illustrated and featuring all new tales of the marvelously macabre *The Darwin Awards Countdown to Extinction* chronicles the astonishing acts of individuals who have taken a swan dive into the shallow end of the gene pool From attaching a five horsepower engine to a barstool to hammering a metal hook into an explosive device to using a taser to treat a snake bite these gloriously gruesome incidents prove that the countdown to human extinction is well under way And we won't exit this mortal coil without one last laugh

Supernormal Stimuli Deirdre Barrett, 2010-02-22 How our once helpful instincts got hijacked by our garish modern world Have you ever wondered why some men choose pornography over actual women Why so many people watch *Friends* instead of going out with their own buddies Why a person would feed a plastic Pocket Pet while shirking real duties Why both sides of every war see the other as the aggressor against whom their Department of Defense must respond Harvard evolutionary psychologist Deirdre Barrett explains how human instincts for food sex or territorial protection developed for life on the savannah ten thousand years ago not for today's world of densely populated cities technological innovations and pollution Evolution quite simply has been unable to keep pace with the rapid changes of modern life We now have access to a glut of larger than life objects from candy to pornography to atomic bombs that gratify outmoded but persistent drives with dangerous results In the 1930s Dutch Nobel laureate Niko Tinbergen found that birds that lay small pale blue eggs speckled with gray preferred to sit on giant bright blue plaster dummies with black polka dots He coined the term supernormal stimuli to describe these imitations that appeal to primitive instincts and oddly exert a stronger attraction than real things Obviously these hard wired preferences pose a danger to a species survival Barrett's singular insight is to apply this phenomenon for the first time to the alarming disconnect between human instinct and our created environment Her book adroitly demonstrates how supernormal stimuli are a driving force in many of today's most pressing problems including obesity our addiction to television and video games and the past century's extraordinarily violent wars Man made imitations it turns out have wreaked havoc on how we nurture our children what food we put into our bodies how we make love and war and even how we understand ourselves Barrett does more than pull the fire alarm to show how these unfettered instincts fuel dangerous excesses There is a hopeful message here as well Once we recognize how supernormal stimuli operate we can craft new approaches to modern predicaments Humans have one stupendous advantage over Tinbergen's birds a giant brain

The message of this book is that this gives us the unique ability to exercise self control override instincts that lead us astray and save ourselves from civilization s gaudy traps

Textbook of Evolutionary Psychiatry and Psychosomatic Medicine Martin Brüne,2015-10-29 This book is unique in taking an evolutionary perspective to understanding psychiatric and psychosomatic conditions It explores how the human brain mind has been shaped by natural and sexual selection and why adaptations to environmental conditions in our evolutionary past may not always work in our best interests

The Origins of Political Order Francis Fukuyama,2011-05-12 Nations are not trapped by their pasts but events that happened hundreds or even thousands of years ago continue to exert huge influence on present day politics If we are to understand the politics that we now take for granted we need to understand its origins Francis Fukuyama examines the paths that different societies have taken to reach their current forms of political order This book starts with the very beginning of mankind and comes right up to the eve of the French and American revolutions spanning such diverse disciplines as economics anthropology and geography The Origins of Political Order is a magisterial study on the emergence of mankind as a political animal by one of the most eminent political thinkers writing today

[From Loneliness to Solitude in Person-centred Health Care](#) Stephen Buetow,2022-08-26 This innovative book provides a new conceptual analysis of loneliness a condition associated with severe health consequences including increased morbidity and early death Arguing that social connection is not the only answer it explores pathways for transforming loneliness to healthy solitude The first part of the book draws on the humanities and arts including psychology philosophy and literature to analyse the common and potentially serious problem of loneliness It makes the case that the condition is less a deficiency than a state of self disconnection that modernity feeds through social forces The second part of the book looks at how person centred health

care can help educate persons to transform loneliness into healthy solitude It provides an analysis of self connection and spiritual connection discussing how these forms of contact can mitigate risks associated with both lack of social connection and social connection itself such as self disconnection and rejection by others It goes on to demonstrate that connection to the self and spirit can make aloneness a resource and facilitate access to benefits of connecting with others This thought provoking book provides students scholars and practitioners from a range of health and social care backgrounds with a new way of thinking about researching and practising with lonely people

Gender and Humor Delia Chiaro,Raffaella Baccolini,2014-05-09 In the mid seventies both gender studies and humor studies emerged as new disciplines with scholars from various fields undertaking research in these areas The first publications that emerged in the field of gender studies came out of disciplines such as philosophy history and literature while early works in the area of humor studies initially concentrated on language linguistics and psychology Since then both fields have flourished but largely independently This book draws together and focuses the work of scholars from diverse disciplines on intersections of gender and humor giving voice to approaches in disciplines such as film television literature linguistics translation studies and popular culture
