Corporate Governance in Contention Ciaran Driver, Grahame Thompson, 2018-06-10 Corporate governance is a complex idea that is often inappropriately simplified as a cookbook of recommended measures to improve financial performance Meta studies of published research show that the supposed benign effects of these measures independent directors or highly incentivised executives are at best context specific There is thus a challenge to explain the meaning purpose and importance of corporate governance This volume addresses these issues The issues discussed centre on relationships within the firm e.g. between labour managers and investors and relationships outside the firm that affect consumers or the environment The essays in this collection are the considered selection by the editors and the contributors themselves of what are seen as some of the most weighty and urgent issues that connect the corporation and society at large in developed economies with established property rights The essays are to be read in dialogue with each other giving a richer understanding than could be obtained by shepherding all contributions into a single mould Nevertheless taken together they demonstrate a shared sense of deep concern that the corporate governance agenda has been and still is on the wrong track The contributors individually and collectively identify in this compendium both a research programme and a platform for change

societal inequities and inequalities around the world For some unfortunate societies already precariously exposed climate change will tip them into societal collapse Devastation will also occur to many ecological values in which all societies are embedded But effective social action can limit the extent of these costs and losses Ultimately only social transformation can limit the social and environmental harms of climate change But what does this mean To what extent is society at risk Are such risks particularized and restricted to specific segments and localities Or is society at risk in a more universal way Climate risks are re shaping the practices of households communities governments and businesses In this way climate risks are a dynamic element in social change and social processes Risk holds a mirror to society revealing who and what is prioritized recognized and valued It also provides a reckoning of our perceived strengths vulnerabilities and weaknesses This volume examines how we understand the societal risks of contemporary and forecast climate change impacts and those risks inherent in dealing with these impacts We know that society is fashioning a new global climate but climate change is also re fashioning society this book explores this dynamic process and considers its implications for future society

Rethinking Capitalism Michael Jacobs, Mariana Mazzucato, 2016-07-21 Thought provoking and fresh this book challenges how we think about economics Gillian Tett Financial Times For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazzucato.com/rethinking-capitalism> Western capitalism is in crisis For decades investment has been falling living standards have stagnated or declined and inequality has risen dramatically Economic policy has neither reformed the financial system nor restored stable growth Climate change meanwhile poses increasing risks to future prosperity In this book some of the world's leading economists propose new ways of thinking about capitalism In clear and compelling prose each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it The chapters examine a range of contemporary economic issues including fiscal and monetary policy financial markets and business behaviour inequality and privatisation and innovation and environmental change The authors set out alternative economic approaches which better explain how capitalism works why it often doesn't and how it can be made more innovative inclusive and sustainable Outlining a series of far reaching policy reforms Rethinking Capitalism offers a powerful challenge to mainstream economic debate and new ideas to transform it

Civic Capitalism Colin Hay, Anthony Payne, 2015-04-17 As we struggle with the legacy of the crisis and with the prospect of accelerating environmental degradation it is time to ask not what we can do for capitalism but what capitalism can do for us as citizens of a democratic society In Civic Capitalism Colin Hay and Anthony Payne build on their influential analysis of the crisis of the Anglo liberal growth model to set out a coherent account of the steps required to build an alternative that is more sustainable socially economically and environmentally They argue that it is time to move on from the Anglo liberal model of capitalism whose failings were so cruelly exposed by the crisis They outline a new model that will work better in advanced capitalist societies showing how this might be achieved in Britain today They call this civic capitalism the governance of the market by the state in the name of the people to deliver collective public goods equity and social justice This reverses the long ascendant logic of Anglo liberalism in which citizens have been made to answer to the perceived logics of the capitalism they have been made to serve The crisis shows us that we can no longer be driven by the perceived imperatives of the old model and by those who have claimed for far too long and as it turns out falsely to be able to discern for us the imperatives of the market It is now time to ask what capitalism can do for us and not what we can do for capitalism

The Knowledge Corrupters Colin Crouch, 2016-04-25 In principle the advanced market driven world in which we now live is fuelled by knowledge information and transparency but in practice the processes that produce this world systematically corrupt and denigrate knowledge this is the powerful and provocative argument advanced by Colin Crouch in his latest exploration of societies on the road to post democracy Crouch shows that executives in profit maximizing corporations have incentives to ignore or distort knowledge especially firms in the information business of the mass media themselves as financial knowledge increasingly trumps the other kinds of knowledge that business needs Firms also seek to take control of public knowledge and use it for their own ends often at the cost of other stakeholders in society Meanwhile the transfer of similar practices to professional public services undermines professional skills and ethics especially when these services are out sourced to the private sector Attempts to extricate ourselves from these problems involve reshaping the complex and often conflicting
