HAWKS ALOFT: THE STORY OF HAWK MOUNTAIN. Maurice Broun, 1950 *Hawks Aloft: the Story of Hawk Mountain* Maurice Broun, 1949 *Gatherings of Angels* Kenneth P. Able, 1999 The migration of birds has forever amazed and confounded onlookers How do birds find their way to their destinations How do they withstand the dangers and rigors of long distance flight The survival of migrant birds is increasingly threatened by environmental degradation and manmade hazards their protection is more critical than ever *Gatherings of Angels* offers first hand accounts by leading experts who convey the beauty and excitement of migration while communicating important messages about avian conservation The book features twenty four pages of stunning color photographs with additional black and white photographs throughout Two chapters of background information on migration precede chapters that focus on different species or groups of birds and the localities essential to their survival from the spring flights of songbirds across the Gulf of Mexico to the massing of sandhill cranes on the Platte River The authors discuss the timing of migrant travel the routes followed and the concentration of birds in stop over sites locations that must be preserved if they are to have secure resting spots with fresh water and ample food to fuel their journey **Rosalie Edge, Hawk of Mercy** Dyana Z. Furmanský, 2010 Rosalie Edge 1877 1962 was the first American woman to achieve national renown as a conservationist Dyana Z Furmanský draws on Edge s personal papers and on interviews with family members and associates to portray an implacable indomitable personality whose activism earned her the names Joan of Arc and hellcat A progressive New York socialite and veteran suffragist Edge did not join the conservation movement until her early fifties Nonetheless her legacy of achievements called widespread and monumental by the *New Yorker* forms a crucial link between the eras defined by John Muir and Rachel Carson An early voice against the indiscriminate use of toxins and pesticides Edge reported evidence about the dangers of DDT fourteen years before Carson s *Silent Spring* was published Today Edge is most widely remembered for establishing Hawk Mountain Sanctuary the world s first refuge for birds of prey Founded in 1934 and located in eastern Pennsylvania Hawk Mountain was cited in *Silent Spring* as an especially significant source of data In 1930 Edge formed the militant Emergency Conservation Committee which not only railed against the complacency of the Bureau of Biological Survey Audubon Society U S Forest Service and other stewardship organizations but also exposed the complicity of some in the squandering of our natural heritage Edge played key roles in the establishment of Olympic and Kings Canyon National Parks and the expansion of Yosemite and Sequoia National Parks Filled with new insights into a tumultuous period in American conservation this is the life story of an unforgettable individual whose work influenced the first generation of environmentalists including the founders of the Wilderness Society Nature Conservancy and Environmental Defense Fund **How to Spot Hawks and Eagles** Clay Sutton, Patricia Sutton, 1996 Hawk and eagle watching is an increasingly popular birding activity Special knowledge is required however and in this lavishly photographed full color book naturalists authors Clay and Patricia Sutton provide all

Nature's Ghosts Mark V. Barrow, 2024-05-31 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature's Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead
