

Structure of training document

The training document is based on the relevant service held at our Linde training centres or at the authorised dealer's premises and is designed to supplement it. The training document begins by itself without an accompanying service is not suitable for self study.

The training document is divided into numbered sections from 1 to 10, with the content being contained in accompanying documents. The sections are only guided by the organisation of the spare parts list and may differ from the content. The circuit diagrams for the truck can be found in section 10 in the Appendix.

Section	Content
1	Product information
2	Vehicle
3	Operation
4	Chassis
5	Undercarriage
6	Controls
7	Electrics / Electronics

Section	Content
7	Introduction
8	Load lift system
9	Special equipment and accessories
10	Circuit diagrams

The training document is designed so that it successfully describes the structure of the truck but is based on a modular concept. This means that in the different sections the individual vehicle components are described as independent units one after the other. This is another reason why a course at one of our training centres is essential.

The introduction is followed by a complete contents list for the training document. This is supplemented by an index at the end of the training document.

Here we should like to inform you that a list of all special tools and measuring instruments used for this truck can be called up referred to here including spare part number, usage and graphics in the documentation software "Truck Expert".
