Linking Restoration and Ecological Succession Lawrence R. Walker, Joe Walker, Richard J. Hobbs, 2007-10-16 While studies of restoration and ecological succession have been published independently there is much overlap between these approaches that has not been adequately explored Linking Restoration and Ecological Succession integrates practical information from restoration projects around the world with the latest developments in successional theory This innovative book recognizes the critical roles of disturbance ecology landscape ecology ecological assembly invasion biology ecosystem health and historical ecology in habitat restoration and argues that restoration within a successional context will best utilize the lessons from each of these disciplines To successfully restore an ecosystem that needs minimal care the temporal dynamics of successional processes must be considered By re examining restoration in the light of succession the authors hope to encourage the development of new approaches to the practice of restoration supported by solid ecological principles

Observing, Modeling and Understanding Processes in Natural and Managed Peatlands Michel Bechtold,Björn Klöve,Annalea Lohila,Massimo Lupascu,Line Rochefort,Hanna Silvennoinen,2022-05-25 Restoration of Ecosystems - Bridging Nature and Humans Stefan Zerbe,2023-02-13 In this interdisciplinary textbook which bridges the gap between the natural and social sciences both the scientific principles of restoration ecology and practical aspects of ecosystem restoration are comprehensively presented The diversity of land use types with a focus on Central Europe is highlighted and case studies of practical restoration projects are presented The textbook offers students who deal with the environment as well as scientists and practitioners a profound and up to date but also critical overview of the state of knowledge This book opens up the broad spectrum of degraded ecosystems of Central European natural and cultural

landscapes In further chapters marine ecosystems and their restoration as well as development potentials and the limits of restoration are discussed in more detail The ecological fundamentals are expanded through an interdisciplinary perspective taking into account environmental ethics sociology anthropology and economics In addition to an up to date overview of the various areas and fields of activity in restoration ecology and ecosystem restoration the textbook provides a valuable basis for studies science and practice The students also receive assistance in searching for literature and critical fact analysis and the lecturers on teaching formats and interdisciplinary approaches to discussion in restoration ecology

Ecology, Planning, and Management of Urban Forests Margaret M. Carreiro, Yong-Chang Song, Jianguo Wu, 2007-10-31 It has been increasingly recognized that trees and vegetation in urban areas provide a number of ecological services beyond beautifying cities The purpose of urban forestry is to use trees and natural habitat patches to ameliorate negative environmental impacts of cities and to contribute to the creation of more livable ecological sustainable cities Ecology Planning and Management of Urban Forests takes an international approach to sharing knowledge about the management of urban forests that has been learned through studies in many different regions This allows the reader to evaluate methods and management that are appropriate for particular geographic environmental and socio political contexts Urban forests are also approached on regional and landscape scales to encompass more natural environments in and around cities rather than within arbitrary municipal boundaries

Wildlife Study Design Michael L. Morrison, William M. Block, M. Dale Strickland, Bret A. Collier, Markus J. Peterson, 2008-03-21 We developed the first edition of this book because we perceived a need for a compilation on study design with application to studies of the ecology conservation and management of wildlife We felt that the need for coverage of study design in one source was strong and although a few books and monographs existed on some of the topics that we covered no single work attempted to synthesize the many facets of wildlife study design We decided to develop this second edition because our original goal synthesis of study design remains strong and because we each gathered a substantial body of new material with which we could update and expand each chapter Several of us also used the first edition as the basis for workshops and graduate teaching which provided us with many valuable suggestions from readers on how to improve the text In particular Morrison received a detailed review from the graduate students in his Wildlife Study Design course at Texas A M University We also paid heed to the reviews of the first edition that appeared in the literature

Science of Ecosystem-based Management Alan Desbonnet, Barry A Costa-Pierce, 2008-01-12 Science for Ecosystem based Management Narragansett Bay in the 21st Century addresses the broad problem of coastal nutrient pollution In the U S approximately two thirds of the coastal rivers and bays are moderately to severely degraded from nutrient pollution However debates continue about how large a problem nutrient pollution is and what actions to take and since effective management requires decisions at a local scale an in depth case study can provide valuable guidance Narragansett Bay is one of the best studied estuaries in the world Rhode Island has been developing regulatory and management actions to reduce nutrient

inputs particularly those of nitrogen to the waters of Narragansett Bay This book was developed in response to a symposium addressing this mandate with coastal estuarine scientists and environmental management agency personnel The contributors use long term data sets to discuss the interactions among biological ecological chemical and physical processes and discuss what is known about nutrient inputs to the bay ecosystem the impacts related to nutrient inputs and how the ecosystem might respond to a sudden reduction in these inputs

Integrating Landscapes: Agroforestry for Biodiversity Conservation and Food Sovereignty Florencia Montagnini, 2024-06-25 This updated and expanded second edition summarizes advances in agroforestry research and practice and proposes alternatives to increase the effectiveness of agroforestry systems It offers an important contribution to help solve the most pressing development and environmental challenges in this sector today The contributing authors present views from the academic the practitioner and the development areas Chapters offer alternatives and suggestions for facing challenges in agroforestry adoption profitability and in the implementation of integrated landscape management approaches With new chapters and substantial revisions made in many others the scope was broadened both geographically and thematically Students Scientists and practitioners will therefore gain more insights from Africa and Asia as well as the Americas

Upendra Kumar,Rahul Mahadev Shelake,Rajni Singh,2023-03-29 Mine Waste Utilization Ram Chandar Karra,Gayana B C,Shubhananda Rao P,2022-07-04 This book is a comprehensive work on utilization of overburden waste ash tailings and other processed waste produced by mining industry It details various laboratory tests to identify the suitability of mine waste It explains varied usage of different types of mine waste as in concrete pavements bricks and to enhance fertile characteristics of waste lands Various physico mechanical properties of mine waste material and their optimum percentage for replacement with sand and coarse aggregate along with additives for optimum strength of concrete bricks are discussed Key features Covers the technical approach in terms of testing and characterizing mine waste Focusses on effective use of mining waste to make sustainable and ecofriendly mining Presents analysis of physical properties of iron ore waste and their usage Describes testing methods for each type of mine waste and its physical property characterization for every application Includes detailed study to use iron ore waste and tailings in concrete pavements This book is aimed at researchers professionals and graduate students in mining geotechnical and civil engineering New Models for Ecosystem Dynamics and Restoration Richard J. Hobbs,Katharine N. Suding,Peter Society for Ecological Restoration International,2013-03-19 As scientific understanding about ecological processes has grown the idea that ecosystem dynamics are complex nonlinear and often unpredictable has gained prominence Of particular importance is the idea that rather than following an inevitable progression toward an ultimate endpoint some ecosystems may occur in a number of states depending on past and present ecological conditions The emerging idea of restoration thresholds also enables scientists to recognize when ecological systems are likely to recover on their own and when active restoration efforts are needed Conceptual models based on alternative stable states and restoration thresholds can help inform restoration efforts New Models for Ecosystem Dynamics and Restoration brings together leading experts from around the world to explore how conceptual models of ecosystem dynamics can be applied to the recovery of degraded systems and how recent advances in our understanding of ecosystem and landscape dynamics can be translated into conceptual and practical frameworks for restoration In the first part of the book background chapters present and discuss the basic concepts and models and explore the implications of new scientific research on restoration practice The second part considers the dynamics and restoration of different ecosystems ranging from arid lands to grasslands woodlands and savannahs to forests and wetlands to production landscapes A summary chapter

by the editors discusses the implications of theory and practice of the ideas described in preceding chapters New Models for Ecosystem Dynamics and Restoration aims to widen the scope and increase the application of threshold models by critiquing their application in a wide range of ecosystem types It will also help scientists and restorationists correctly diagnose ecosystem damage identify restoration thresholds and develop corrective methodologies that can overcome such thresholds

Ecological Restoration Law Afshin Akhtar-Khavari, Benjamin J. Richardson, 2019-01-25 Ecological restoration is as essential as sustainable development for the health of the biosphere Restoration however has been a low priority of most countries environmental laws which tend to focus narrowly on rehabilitation of small discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes Through critical theoretical perspectives and topical case studies this book s diverse contributors explore a more ambitious agenda for ecological restoration law Not only do they investigate current laws and other governance mechanisms they also consider the philosophical and methodological bases for the law to take ecological restoration more seriously Through exploration of themes relating to time space geography semiotics social justice and scientific knowledge this book offers innovative and critical insights into ecological restoration law Çayır Mera Yönetimi Canan ŞEN, 2025-09-29
