Integrated Care in Psychiatry Paul Summergrad, Roger G. Kathol, 2014-04-26 Integrated Care in Psychiatry Redefining the Role of Mental Health Professionals in the Medical Setting is a landmark title in the field offering a clear detailed and cohesive call by leading experts for coordinated care for patients

with concurrent psychiatric and medical conditions The renowned editors and authors argue that what is slowly occurring and greatly needed at a faster pace is nothing less than a sea change in the way that psychiatric care will be delivered The current mostly segregated medical and psychiatric model of care has led to the development of competing medical and psychiatric subcultures that have resulted in a lack of dialog among health providers administrators and payers and thus in less than optimal patient outcomes To remedy this problem the book offers a practical insightful road map to achieving the central tenet of health reform truly coordinated patient centered care where the care experience for the patient the medical care itself and the cost outcomes improve as the system changes from fee for service to population based health An invaluable reference for all clinicians policy makers payers administrators and others interested in the debate surrounding healthcare systems Integrated Care in Psychiatry Redefining the Role of Mental Health Professionals in the Medical Setting is a major contribution to the literature and a gold standard resource

Strengthening the DSM Betty Garcia, Anne Petrovich, 2011-04-15 As it stands the DSM fails to address important sources of strength and resiliency that can significantly affect diagnosis and treatment The authors of this transformative volume propose enhancements to the current diagnostic and classification system that encompass the biopsychosocial cultural and spiritual milieus of individuals and acknowledge the strengths originating from personal family and community resources This proposed Axis VI addresses contextual and individual factors related to diversity equity and resiliency thereby enabling an understanding of the whole person and offering significant resources for treatment Within each chapter the authors demonstrate the use of strength based multicultural diagnostic processes and application of Axis VI to specific disorders including mood disorders anxiety disorders conduct disorders oppositional defiant disorder dementia Alzheimer s disease schizophrenia and other psychoses and substance related and co occurring disorders The text also reviews relevant etiology and evidence based research for each disorder and highlights current strength based and culturally competent approaches to diagnosis and treatment For the utmost clarification case vignettes for each disorder describe diagnosis with and without the use of Axis VI Key Features Demonstrates the potential of a strength based culturally competent approach to improve mental health diagnosis and treatment Addresses current perspectives on the role of biological genetic and psychosocial factors in mental illness Includes current research on the course of illness and findings on co occurring disorders as well as risk and protective factors Identifies evidence informed practice that builds on neurobiological and psychosocial findings Explores factors related to social justice and disempowerment issues in relation to disorders Offers current findings from equity and diversity based research Reviews current DSM 5 discussion of specific disorders Presents case vignettes including their multiaxial diagnosis with and without Axis VI

The Primary Care Toolkit for Anxiety and Related Disorders Dr. Bianca Lauria-Horner, 2016-10-10 Primary care physicians know from experience how many patients

come to them needing help with anxiety and related disorders these disorders have a lifetime prevalence rate of 30% but they often seem to be present in a much higher proportion of primary care visits Time pressure challenges every primary care provider who responds to these disorders The Primary Care Toolkit for Anxiety and Related Disorders carefully aligned with the DSM 5 gives you the tools to help you treat your patients promptly and effectively Quickly find the information and strategies you need using summaries of diagnostic criteria and pharmacological therapies severity assessments treatment summaries and case studies Efficiently screen diagnose and manage common anxiety and related disorders using visit by visit guides for mild moderate and severe disorders An accompanying CD puts the best most effective diagnostic tools at your fingertips ready to be printed and used by you and your patients patient self report forms and questionnaires symptom checklists functional impairment assessment scales and more The Primary Care Toolkit helps prepare you for the 7 anxiety and related disorders that primary care physicians see most often Generalized anxiety disorder Panic disorder Agoraphobia Social anxiety disorder Obsessive compulsive disorder Posttraumatic stress disorder Adjustment disorder Whether you are a family physician an ER doctor a pharmacist a nurse or nurse practitioner or a medical student the information and resources in The Primary Care Toolkit for Anxiety and Related Disorders will add to your clinical primary care knowledge and skills

Primary Care Mental Health Linda Gask,Tony Kendrick,Robert Peveler,Carolyn A. Chew-Graham,2018-09-20 Around ninety per cent of all patients with mental health problems are managed solely in primary care including thirty fifty per cent of all those with serious mental illness Primary care plays an increasingly essential role in developing and delivering mental health services and in the wellbeing of communities In this book internationally respected authors provide both a conceptual background and practical advice for primary care clinicians and specialist mental health professionals liaising with primary care Clinical policy and professional issues such as working effectively at the interface between services are addressed with a key focus on patient and service user experience Following the highly successful first edition which was awarded first prize at the BMA Medical Book Awards in the category of Primary Health Care this fully updated volume includes new chapters on mental health and long term physical conditions prison populations improving access to care and public mental health

Age-Adjusted Psychiatric Treatment for the Older Patient Howard H. Fenn,James A. Bourgeois,Catharine Birtley Fenn,2024-06-10 This book offers practical age adjusted recommendations to treat the most common psychiatric symptoms and syndromes in the geriatric patient The principles described here are not new advice for prescribing to the aging patient has always been to start low go slow This book fleshes out that dictum based on research evidence clinical experience and trends in the literature An age adjusted approach endorses medication interventions when needed as part of a comprehensive treatment plan A combination of psychotherapeutic interventions non pharmacological modalities and judiciously managed medications can improve quality of life and minimize risks inherent in pharmacotherapy applied to aging physiology Age Adjusted Psychiatric Treatment for the Older Patient is divided into five sections covering the foundations of

evaluation and treatment neurocognitive disorders psychiatric syndromes therapeutics and interventions and special topics Each chapter begins with a complex case example that illustrates the topic It then reviews current evidence based evaluation and treatments Age adjusted recommendations distilled from the literature are offered at the end of each chapter The intent is to provide actionable advice to supplement but not supplant good clinical judgement which can improve quality of life by managing psychiatric symptomatology while averting untoward results This volume is an essential guide for experienced clinicians as well as trainees across many health care disciplines both generalists and geriatric specialists who all see increasing numbers of aged patients with psychiatric symptomatology

Mental Health and Development Natalie Drew,Michelle Funk,World Health Organization,2010 This report presents compelling evidence that people with mental health conditions meet major criteria for vulnerability The report also describes how vulnerability can lead to poor mental health and how mental health conditions are widespread yet largely unaddressed among groups identified as vulnerable It argues that mental health should be included in sectoral and broader development strategies and plans and that development stakeholders have important roles to play in ensuring that people with mental health conditions are recognized as a vulnerable group and are not excluded from development opportunities The recommended actions in this report provide a starting point to achieve these aims Page xxiv
