The Athenaeum ,1919 *The Athenæum* ,1919 **The Athenaeum** James Silk Buckingham,John Sterling,Frederick Denison Maurice,Henry Stebbing,Charles Wentworth Dilke,Thomas Kibble Hervey,William Hepworth Dixon,Norman Maccoll,Vernon Horace Rendall,John Middleton Murry,1919 *On the Sweet Spot* Richard Keefe,2007-11-01 Like most moments of spiritual revelation this one took place on a landfill in New Jersey A young man is standing at an unprepossessing driving range hitting balls toward a distant fence when something unusual takes place As he begins his swing he has the sensation that his club is drawing itself back on its own when it is ready it starts downward makes perfect contact and the ball soars off in the right to left arc he d imagined hitting the exact fencepost he d been aiming at from 250 yards away He steps back and wonders if he can do it again He feels like an observer as the swing begins itself and resolves itself after perfect contact with the waiting ball which again smacks against the distant post He has for however brief a time entered the zone Everyone who plays a sport knows that fleeting ineffable sensation of everything falling into place The pitched baseball looks as big as a grapefruit the basket looks as wide as a trash can the players around you are moving in slow motion But as Richard Keefe the director of the sport psychology program at Duke University looked deeper into the nature of his experience he found profound links to the spirit the brain perhaps even the soul Keefe recognized that the feeling golfers and other athletes have of being in the zone is basically the same as a meditative state And as a researcher with experience in brain chemistry he went one step further If we can figure out what s happening in the brain at such times he reasons we can learn how to get into that zone instead of just waiting for it to happen This is the Holy Grail of sport psychology teaching the mind to get out of the way so the body can do the things it s capable of doing Keefe calls it the effortless present when the

body is acting of its own accord while the brain has little to do but watch All religions describe some kind of heightened awareness in their disciplines Keefe explores whether such mystical experience is a fundamental aspect of our evolution an integral part of what makes us human and keeps us from despair And he brings the discussion back to the applications of such knowledge reflecting on our ability to use these alternate planes to achieve better relationships better lives better moments Keefe s true subject is extraordinary experience being in the zone in the realm of effortless action On the Sweet Spot builds from the physical and neurological to the mystical and philosophical then adds a crucial layer of the practical how we can capture or recapture these wondrous states It is a work in the proud tradition of *The Sweet Spot in Time Flow The Psychology of Optimal Experience and How the Mind Works* *The Art of College Teaching* Marilyn Kallet, April L. Morgan, 2005 Teachers everywhere are confronted with a problem Whether at a small liberal arts college major research university or some other institute of learning instructors are continually challenged to create smart effective pedagogical techniques in order to be efficient in the classroom *The Art of College Teaching* is a first twenty eight insider essays about this process by distinguished and highly acclaimed teachers of note from across the curriculum including eleven Carnegie national award winners grouped here to uncover common values approaches and even debates among today s educators Rather than a rulebook for good teaching Professors Marilyn Kallet and April Morgan have assembled a wide variety of practitioner lore what successful teachers have learned to do well and what they re still seeking to master From the embarrassing to the inspirational contributors take us inside their classrooms to explain the light bulb moments that form the bases of their teaching philosophies making this collection reader friendly often humorous and very real Contributors take up a broad range of subjects setting boundaries with students teaching as performance the pros and cons of lecture versus active learning gaining students respect and keeping it creativity in the classroom encouraging diversity and many others The interdisciplinary approach allows for a stimulating mix of voices and kinds of expertise from takes on teaching by Nobel Prize Laureate James Buchanan to coaching strategies from champion ice skating instructor Robert Unger Theories about the right way to teach abound but like any art teaching isn t easily defined by guidelines or prevailing wisdom A narrative experiential approach to one of our most rewarding and demanding disciplines *The Art of College Teaching* is a book to be of use It is a handbook of ideas that will empower new teachers and refresh those who have been in the trenches for years
