Lighting Techniques For Low Key Portrait Photography:

Lighting Techniques for Low Key Portrait Photography Norman Phillips, 2006 The key of an image describes its overall tonal range In low key images the tones in the clothing props and background are primarily dark While simple in theory creating this style presents some unique challenges Phillips demonstrates how to create a studio setup use window light and employ natural light on location He also shows readers how to meter accurately for perfect exposures select an ideal background and compose low key images

Advanced Studio Lighting Techniques for Digital Portrait Photographers Norman Phillips, 2006-06-01 Portraiture tends to rely on standardized established lighting techniques but most photographers know that subscribing to traditional methods does not always flatter every subject The techniques collected in this guide will heighten the senses of mystery and drama in a digital photographer's work by enhancing shape and contrast keeping images fashionable and appealing with less reliance on natural light and illuminating a subject's eyes without producing catchlights In this manner textbook lighting setups can act as a springboard to creating personal and artistic high quality portraits featuring new radically altered lighting effects Multiple series of before and after photos comprehensively illustrate how to utilize these new methods to create emotion evoking works of art that do more than simply capture the likeness of a subject

Lighting Techniques for Middle Key Portrait Photography Norman Phillips, 2008 Examines a much overlooked subject in photography the middle key As Phillips shows the fact that many photographers ignore middle key as a way of constructing their images results in portraits that look cluttered or visually confusing By approaching these images with the concept of middle key in mind it becomes much easier for the photographer to avoid common errors and produce images with greater impact
