Lights Out Cyberattack Unprepared Surviving:

Lights Out Ted Koppel, 2016-10-18 NEW YORK TIMES BESTSELLER Ted Koppel reveals that a major cyberattack on America's power grid is not only possible but likely that it would be devastating and that the United States is shockingly unprepared Fascinating frightening and beyond timely Anderson Cooper Imagine a blackout lasting not days but weeks or months Tens of millions of people over several states are affected For those without access to a generator there is no running water no sewage no refrigeration or light Food and medical supplies are dwindling Devices we rely on have gone dark Banks no longer function looting is widespread and law and order are being tested as never before It isn't just a scenario A well designed attack on just one of the nation's three electric power grids could cripple much of our infrastructure and in the age of cyberwarfare a laptop has become the only necessary weapon Several nations hostile to the United States could launch such an assault at any time In fact as a former chief scientist of the NSA reveals China and Russia have already penetrated the grid And a cybersecurity advisor to President Obama believes that independent actors from hacktivists to terrorists have the capability as well It's not a question of if says Centcom Commander General Lloyd Austin it's a question of when And yet as Koppel makes clear the federal government while well prepared for natural disasters has no plan for the aftermath of an attack on the power grid The current Secretary of Homeland Security suggests keeping a battery powered radio In the absence of a government plan some individuals and communities have taken matters into their own hands Among the nation's estimated three million preppers we meet one whose doomsday retreat includes a newly excavated three acre lake stocked with fish and a Wyoming homesteader so self sufficient that he crafted the thousands of adobe bricks in his house by hand We also see the unrivaled disaster preparedness of the Mormon church with its enormous storehouses high tech dairies orchards and proprietary trucking company the fruits of a long tradition of anticipating the worst But how Koppel asks will ordinary civilians survive With urgency and authority one of our most renowned journalists examines a threat unique to our time and evaluates potential ways to prepare for a catastrophe that is all but inevitable **Lights Out** Instaread, 2015-11-24

Apocalypse Rising Timothy Ph.D. Dailey,2016-08-02 A Revealing Look at the Signs of the End Times After decades of researching biblical prophecy bestselling author Timothy

Dailey warns that end time events are closer than we realize Connecting the dots between history archeological findings first hand accounts and Scripture Dr Dailey shows that malevolent forces are converging to trigger the end of human history He reveals the hidden activity of Gog and Magog over the millennia worldly portals opening for the Antichrist counterfeit signs and wonders and much more Yet under the shadow of the apocalypse the world is witnessing an unprecedented spiritual revival and outpouring of the miraculous It s time for us to read the signs and take a stand knowing that Jesus has promised to be with us to the end of the age **Moment of Truth** Kelly McKinney,2018-07-17 Miami Beach Devastated by Monster Category 5 Hurricane Times Square Incinerated by Homemade Nuclear Bomb Magnitude 9 0 Earthquake Reduces Downtown Seattle to Rubble These aren t actual headlines but they could be Even though they sound like next summer s blockbuster movies each of these worst case scenarios is a real threat a threat for which America is hugely underprepared But it doesn t have to be that way This is not a book about disasters Instead Moment of Truth will tell you what these genuine threats mean for society as a whole as well as for your region or town or you All we have to do is open our eyes and look beyond the brick wall of hope that clouds our vision in collective denial In addition to advice for government Moment of Truth contains practical steps that you can take now keep you and your family safe in the face of the next catastrophe Because it may come down to just you The Transformation of Citizenship, Volume 1 Juergen Mackert,Bryan Turner,2017-03-16 The

Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies
