Like Engend'ring Like Nicholas Russell, 2007-03-15 This book examines the ideas and techniques of earlier generations of agricultural and sporting improvers in the seventeenth and eighteenth centuries *Early Modern Conceptions of Property* John Brewer, Susan Staves, 2014-01-14 Original historical and literary case studies Distinguished contributors from different fields law art history literature Challenging and sophisticated theory International perspective First book in series brilliantly reviewed **The Perfection of Nature** Mackenzie Cooley, 2022-10-26 A deep history of how Renaissance Italy and the Spanish empire were shaped by a lingering fascination with breeding The Renaissance is celebrated for the belief that individuals could fashion themselves to greatness but there is a dark undercurrent to this f ted era of history The same men and women who offered profound advancements in European understanding of the human condition and laid the foundations of the Scientific Revolution were also obsessed with controlling that condition and the wider natural world Tracing early modern artisanal practice Mackenzie Cooley shows how the idea of race and theories of inheritance developed through animal breeding in the shadow of the Spanish Empire While one strand of the Renaissance celebrated a liberal view of human potential another limited it by biology reducing man to beast and prince to stud Race Cooley explains first referred to animal stock honed through breeding To those who invented the concept race was not inflexible but the fragile result of reproductive work As the Spanish empire expanded the concept of race moved from nonhuman to human animals Cooley reveals how as the dangerous idea of controlled reproduction was brought to life again and again a rich complex and ever shifting language of race and breeding was born Adding nuance and historical context to discussions of race and human and animal relations The Perfection of Nature provides a close reading of undertheorized notions of generation and its discontents in the more than human world **Made to Order** Margaret E. Derry, 2022-03-01 Animal breeding has been complicated by persisting factors across species cultures geography and time In Made to Order Margaret E Derry explains these factors and other breeding concerns in relation to both animals and society in North America and Europe over the past three centuries Made to Order addresses how breeding methodology evolved what characterized the aims of breeding and the way structures were put in place to regulate the occupation Illustrated by case studies on important farm animals and companion species the book presents a synthetic overview of livestock breeding as a whole It gives considerable emphasis to genetics and animal breeding in the post 1960 period the relationship between environmental and improvement breeding and regulation of breeding as seen through pedigrees In doing so Made to Order shows how studying the ancient human practice of animal breeding can illuminate the ways in which human thinking theorizing and evolving characterize our interactions with all natural processes **A Guinea Pig's History of Biology** Jim Endersby, 2007 Biology today promises everything from better foods or cures For common diseases to the alarming prospect of redesigning life itself Looking at the organisms that have made all this possible gives us a new way of understanding how we got here and perhaps of thinking

about where we're going Instead of a history of which great scientists had which great ideas this story of passionflowers and hawkweeds of zebra fish and viruses oilers a bird's or rodent's eye view of the work that makes science possible Book Jacket

Reproduction Nick Hopwood, Rebecca Flemming, Lauren Kassell, 2018-12-06 From contraception to cloning and pregnancy to populations reproduction presents urgent challenges today This field defining history synthesizes a vast amount of scholarship to take the long view Spanning from antiquity to the present day the book focuses on the Mediterranean western Europe North America and their empires It combines history of science technology and medicine with social cultural and demographic accounts Ranging from the most intimate experiences to planetary policy it tells new stories and revises received ideas An international team of scholars asks how modern reproduction an abstract process of perpetuating living organisms replaced the old generation the active making of humans and beasts plants and even minerals Striking illustrations invite readers to explore artefacts from an ancient Egyptian fertility figurine to the announcement of the first test tube baby Authoritative and accessible Reproduction offers students and non specialists an essential starting point and sets fresh agendas for research

Milk and Honey Tamar Novick, 2023-08-08 An innovative historical analysis of the intersection of religion and technology in making the modern state focusing on bodily production and reproduction across the human animal divide In Milk and Honey Tamar Novick writes a revolutionary environmental history of the state that centers on the intersection of technology and religion in modern Israel Palestine Focusing on animals and the management of their production and reproduction across three political regimes the late Ottoman rule British rule and the early Israeli state Novick draws attention to the ways in which settlers and state experts used agricultural technology to recreate a biblical idea of past plenitude literally a land flowing with milk and honey through the bodies of animals and people Novick presents a series of case studies involving the management of water buffalo bees goats sheep cows and people in Palestine Israel She traces the intimate forms of knowledge and bodily labor production and reproduction in which this process took place and the intertwining of bodily political and environmental realms in the transformation of Palestine Israel Her wide ranging approach shows technology never replaced religion as a colonial device Rather it merged with settler colonial aspirations to salvage the land bolstering the effort to seize control over territory and people Fusing technology religious fervor bodily labor and political ecology Milk and Honey provides a novel account of the practices that defined and continue to shape settler colonialism in the Palestine Israel revealing the ongoing entanglement of technoscience and religion in our time

Bred for Perfection Margaret E. Derry, 2003-11-11 How did animal breeding emerge as a movement Who took part and for what reasons How do the pedigree and market systems work What light might the movement shed on the assumptions behind human eugenics In Bred for Perfection Margaret Derry provides the most comprehensive and accessible book yet published on the human quest to improve and develop livestock Derry herself a breeder and trained historian of science explores the triangle of genetics eugenics and practical breeding focusing on Shorthorn cattle show dogs and working dogs

and one type of purebred horse the Arabian By examining specific breeders and the animals they produced she illuminates the role of technology genetics culture and economics in the system of purebred breeding Bred for Perfection also provides the historical context in which this system arose adding to our understanding of how domestication works and how our welfare since the dawn of time has been intertwined with the lives of animals **Horse People** Rebecca Cassidy,2007-12 Cassidy s investigation reveals the factors ethical cultural political and economic that have shaped the racing tradition

Masterminding Nature Margaret Derry,2015-03-27 In Masterminding Nature Margaret Derry examines the evolution of modern animal breeding from the invention of improved breeding methodologies in eighteenth century England to the application of molecular genetics in the 1980s and 1990s A clear and concise introduction to the science and practice of artificial selection Derry s book puts the history of breeding in its scientific commercial and social context Masterminding Nature explains why animal breeders continued to use eighteenth century techniques well into the twentieth century why the chicken industry was the first to use genetics in its breeding programs and why it was the dairy cattle industry that embraced quantitative genetics and artificial insemination in the 1970s as well as answering many other questions Following the story right up to the present the book concludes with an insightful analysis of today s complex relationships between biology industry and ethics

Horses in Society Margaret Elsinor Derry,2006-01-01 Before crude oil and the combustion engine the industrialized world relied on a different kind of power the power of the horse Horses in Society is the story of horse production in the United States Britain and Canada at the height of the species usefulness the late nineteenth and early twentieth century Margaret E Derry shows how horse breeding practices used during this period to heighten the value of the animals in the marketplace incorporated a intriguing cross section of influences including Mendelism eugenics and Darwinism Derry elucidates the increasingly complex horse world by looking at the international trade in army horses the regulations put in place by different countries to enforce better horse breeding and general aspects of the dynamics of the horse market Because it is a story of how certain groups attempted to control the market for horses by protecting their breeding activities or patenting their work Horses in Society provides valuable background information to the rapidly developing present day problem of biological ownership Derry s fascinating study is also a story of the evolution of animal medicine and humanitarian movements and of international relations particularly between Canada and the United States
