Listen To The Landscape:

Listen to the Landscape Linda Nemec Foster, 2006-07-28 Mirroring the human response to the natural world this book is a rare synthesis of stunning landscape photography and understated haiku poetry Dianne Carroll Burdick has photographed what she sees but expressed what she feels by hand coloring her photographic images Linda Nemec Foster has followed the traditional form created by Japanese poets over five hundred years ago to pen elegant haiku Together the two explore edges ocean meeting sand lakes meeting grass trees meeting sky These landscapes of color and sound will usher you into quiet meditative spaces where you can truly listen to yourself and the environment around you *Listening to Landscape* Phil Hubbard, 2025-10-16 The first book length exploration of how English landscapes are represented in contemporary electronic and experimental music Listening to Landscape ploughs its own furrow combining ideas from psychogeography hauntology and landscape studies to offer a distinctive take on the way contemporary music deals with the ghosts of an England that is fast disappearing Away from the Top 40 and often circulating in the form of obscure cassette releases and limited vinyl runs acts including Belbury Poly Craven Faults epic45 Gilroy Mere Spaceship Vic Mars Warrington Runcorn New Town Development Plan and many others besides work in experimental genres including folktronica ambient modular synth drone post rock and noise But all have an apparent preoccupation with summoning the essence of place often working with ideas of memory loss and thwarted futurity associated with disappearing or threatened English landscapes Moving deftly between cultural theory musicology and geography Listening to Landscape serves as a primer on the hauntological music scene that appears fixated on questions of landscape and Englishness It argues this music is no mere exercise in nostalgia but a provocation asking us to re imagine England s place in the world at a time of economic and environmental crisis Listening to Landscape speaks to urgent questions of national identity in the post Brexit era offering a distinctive take on the way contemporary culture deals with the ghosts and memories of Albion Includes a foreword by Justin P Hopper author of The Old Weird Albion *Archaeologies of Listening* Peter R. Schmidt, Alice B. Kehoe, 2022-04-26 Archaeologists tend to rely on scientific methods to reconstruct past histories an approach that can alienate local indigenous populations and limit the potential of archaeological research Essays in this volume argue that listening to and learning from local and descendant communities is vital for interpreting the histories and heritage values of archaeological sites Case studies from around the world demonstrate how a humanistic perspective with people centric practice decolonizes the discipline by unlocking an intellectual space and collaborative role for indigenous people These examples show how listening to oral traditions has opened up broader understandings of ancient rituals in Tanzania where indigenous knowledge paved the way to significant archaeological finds about local iron technology Archaeologists working with owners of traditional food ovens in Northern Australia discovered the function of mysterious earth mounds nearby and the involvement of local communities in the interpretation of the Sigiriya World Heritage Site in Sri Lanka led to a better understanding of indigenous

values The ethical implications for positioning archaeology as a way to bridge divisions are also explored In a case study from Northern Ireland researchers risked sparking further conflict by listening to competing narratives about the country's political past and a study of archival records from nineteenth century grave excavations in British Columbia where remains were taken without local permission reveals why indigenous people in the region still regard archaeology with deep suspicion The value of cultural apprenticeship to those who have long term relationships with the landscape is nearly forgotten today contributors argue This volume points the way to a reawakening of the core principles of anthropology in archaeology and heritage studies Contributors Peter Schmidt Alice Kehoe Kathryn Weedman Arthur Catherine Carlson Billy Foghl Audrey Horning Steve Mrozowski George Nicholas Innocent Pikirayi Jonathan Walz Camina Weasel Moccasin Jagath Weerasinghe

Landscape as Sacred Space Steven Lewis, 2005-07-15 Steven Lewis's *Landscape as Sacred Space* Metaphors for the Spiritual Journey invites new discussions about our spiritual journeys and allows seekers to rethink approaches to Christian spirituality and theology in light of postmodernity Landscape metaphors provide a common and accessible language to articulate one's spiritual journey Spiritual mountains deserts and valleys are dominant landscapes on our journey through life Most people have experienced the joy of a mountaintop spiritual experience the pain of spiritual deserts or perhaps the dreariness too often associated with spiritual valleys There is a tendency however to highlight spiritual mountaintops while avoiding spiritual deserts and ignoring spiritual valleys This leaves many Christians ill equipped either to deal with crises or to integrate God into ordinary life Each landscape offers rich lessons that when combined together lead us toward a maturing faith and into a deeper relationship with God *Landscape as Sacred Space* is intended to aid those who search for more meaningful ways to articulate their faith journey The book grants permission to struggle with life's landscapes provides safe spaces to reflect on the journey and introduces language that enables exploration and discovery **Listen!** Scott Neigh, 2025-10-21T00:00:00Z *Listen* expands our understanding of listening as not an individual passive act but as fundamental to constructing the social world and to making it more just As an activist journalist and host of Talking Radical Radio Scott Neigh shares what he's learned from decades of conversing with other activists and scholars What does it mean to find oneself overwhelmed by a world in turmoil as the relentless news of genocide climate change and police violence drives home the urgent need for radical change but doesn't tell us how to make it happen *Listen* reflects deeply on the role of listening from the moment of injustice to how we respond as individuals to struggles by collective social movements The book explores what these movements are how they work and what they do in the world as well as the knowledge generated in and by them and the importance of listening to and within them By sharpening our critical insight into listening we can explicitly centre sensory pathways to understanding and strengthen our strategies for collective liberation as embodied and situated knowers *Sensing the Landscape* Karis Jade Petty, 2025-03-10 This book examines how vision impaired walkers experience and engage with the English countryside through five sensory activities walking seeing listening seeing in the mind's eye and

Strategic Listening Mats Heide,Anette Svingstedt,2023-11-28 Listening is so simple yet so difficult Many times listening is taken for granted One could therefore say that listening is the forgotten part of communication Although organizations have more digital and analog communication channels than ever too little time is spent listening to customers employees and other influential groups It is a shame that listening is not given more attention as it is linked to many positive values Examples include better conversations increased trust and confidence more outstanding commitment and job satisfaction lower absenteeism due to illness higher productivity and quality of work increased sales better relationships with customers and employees and many other positive effects To the extent that listening takes place organizations rarely take a holistic approach to it Strategic listening means a given objective for listening thoughts about who should listen when it should happen and so on An organization s listening must become a strategic issue to exploit the great potential of increased listening This book provides answers to the following Why is listening important What are the barriers to listening How can both individuals and organizations become better at listening How can organizations develop strategic listening skills How does one build a system to improve an organization s strategic listening **Listening through the Noise** Joanna Demers,2010-07-30 Contemporary electronic music has splintered into numerous genres and subgenres all of which share a concern with whether sound in itself bears meaning Listening through the Noise considers how the experience of listening to electronic music constitutes a departure from the expectations that have long governed music listening in the West

Reanimating Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body
