

# CHAPTER 6

## Inventories

### ANSWERS TO QUESTIONS

1. Agree. Effective inventory management is frequently the key to successful business operations. Management attempts to maintain sufficient quantities and types of goods to meet expected customer demand. It also seeks to avoid the cost of carrying inventories that are clearly in excess of anticipated sales.
2. Inventory items have two common characteristics: (1) they are owned by the company, and (2) they are in a form ready for sale in the ordinary course of business.
3. Taking a physical inventory involves actually counting, weighing, or measuring each kind of inventory on hand. Retailers, such as a hardware store, generally have thousands of different items to count. This is normally done when the store is closed.
4. (a) (1) The goods will be included in Girard Company's inventory if the terms of sale are FOB destination.  
(2) They will be included in Liu Company's inventory if the terms of sale are FOB shipping point.  
(b) Girard Company should include goods shipped to another company on consignment in its inventory. Goods held by Girard Company on consignment should not be included in inventory.
5. Inventoriable costs are £3,050 (invoice cost £3,000 + freight charges £80 – purchase discounts £30). The amount paid to negotiate the purchase is a buying cost that normally is not included in the cost of inventory because of the difficulty of allocating these costs. Buying costs are expensed in the year incurred.
6. FOB shipping point means that ownership of goods in transit passes to the buyer when the public carrier accepts the goods from the seller. FOB destination means that ownership of goods in transit remains with the seller until the goods reach the buyer.
7. Actual physical flow may be impractical because many items are indistinguishable from one another. Actual physical flow may be inappropriate because management may be able to manipulate net income through specific identification of items sold.
8. The major advantage of the specific identification method is that it tracks the actual physical flow of the goods available for sale. The major disadvantage is that management could manipulate net income.
9. No. Selection of an inventory costing method is a management decision. However, once a method has been chosen, it should be used consistently from one accounting period to another.
10. (a) FIFO.  
(b) Average-cost.  
(c) FIFO.
