Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

The 2015 Gasson Lecturers Frank Brennan, 2016-03-31 In these Gasson Lectures Frank Brennan addresses various contested contemporary issues such as church state relations physician assisted suicide and national border protection He writes I hope that these lectures can help persons of all faiths and none maintain what Pope John Paul II when addressing the Italian Parliament called a convinced and pondered trust in the heritage of virtues and values handed down by your forebears In these lectures I have drawn much inspiration from Pope Francis who travelled to the island of

Lampedusa to speak boldly and prophetically about the plight of asylum seekers coming across the Mediterranean Sea in search of new life Before offering his blessing and casting a wreath on the waters Francis asked Who is responsible for the blood of these brothers and sisters of ours In these lectures I seek to draw on my own religious tradition to answer that question to the satisfaction of persons of all faiths and none and in the many precarious situations in which people find themselves especially at the borders of life and of nation states China's Policy towards the South China Sea Lingqun Li, 2018-02-19 This book provides an explanation of Chinese policy towards the South China Sea and argues that this has been sculpted by the changing dynamics of the law of the sea in conjunction with regional geopolitical flux The past few decades have witnessed a bifurcated trend in China's management of territorial disputes Over the years while China gradually calmed and settled most land border disputes with its neighbors disputes on the ocean frontier continued to simmer in a seething cauldron China's Policy towards the South China Sea attributes the distinctive path of China's approach to maritime disputes to a unique factor the law of the sea LOS as the rules of the road in the ocean By deconstructing the concept of sovereignty and treating the LOS as an evolving regime the book examines how the changing dynamics of the LOS regime have complicated and reshaped the nature and content of sovereign disputes in the ocean regime as well as the options of settlement Applying the findings to the South China Sea case the author traces the learning curve on which China has embarked to comprehend the complexity of the dispute accordingly and finds that it is the dynamic interaction of the law of the sea regime and the geopolitical conditions that has driven the evolution of China's South China Sea policy This book will be of great interest to students of Chinese and Asian politics international law international relations and security studies

Challenges of European External Energy Governance with Emerging Powers Michèle Knodt, Nadine Piefer, 2016-03-03 In a multipolar world with growing demand for energy not least by Emerging Powers such as Brazil India China or South Africa

BICS questions of EU external energy governance would at first hand appear to be a high priority Yet reality tells a different story the EU s geographical focus remains on adjacent countries in the European neighbourhood and on issues related to energy security Despite being Strategic Partners and engaging in energy dialogues it seems that the EU is lacking strategic vision and is not perceived as a major actor in energy cooperation with the BICS Thus political momentum for energy cooperation and joint governance of scarce resources is vanishing Resulting from three years of international interdisciplinary research cooperation among academics and practitioners in Europe and the BICS countries within a project funded by the Volkswagen Foundation this volume addresses one of the greatest global challenges Specific focus lies on the bilateral energy dialogues and Strategic Partnerships between the EU and Emerging Powers regarding bilateral inter and transnational energy cooperation Furthermore the analysis provides policy recommendations in order to tap the full potential of energy cooperation between the EU and Brazil India China and South Africa

other SOFA rules The Handbook then continues its analysis through cases studies of visiting forces in key countries including a fully updated chapter on Afghanistan that considers the various stages of the conflict before offering conclusions on the current state of the law and its likely future development
