Fundamentals of, and Applications Based on, Quorum Sensing and Quorum Sensing Interference Cristina García-Aljaro, Ana Otero, Tom Defoirdt, 2020-01-23 Background Bacteria use quorum sensing QS circuits to coordinate various activities among which biofilm formation and the expression of virulence factors based on the presence of signaling molecules Different families of signal molecules have been identified in Gram positive and Gram negative bacteria e.g. autoinducer peptides and acyl homoserine lactones Similarly different quorum sensing antagonists interfering with these system have been found in nature promoting a new and promising field of research quorum sensing interference One of the most intensively studied applications of quorum sensing interference is its use as an alternative or synergically with antibiotics to fight antibiotic resistant bacterial pathogens Many studies have been published claiming quorum sensing inhibitory activity of natural and synthetic compounds However after decades of research several questions regarding the suitability of this approach to fight bacterial pathogens remain unanswered including the risk that pathogens will develop resistance against quorum quenching Meanwhile the interest in quorum sensing has increased considerably and this has broadened the fields where it can find biotechnological environmental and industrial applications such as anti biofouling steering fermentations bioremediation and wastewater treatment Goal and scope The goal of this Research Topic is to broaden the knowledge of the phenotypes regulated by quorum sensing and the advances in quorum

sensing interference Deciphering microorganism language and the different phenotypes regulated by microbial signalling systems is a frontier for the development of new tools for the management of microorganisms to fulfil human needs with a broad application in different areas such as medicine environmental sciences and industry **Smart** Frederic Martel,2018-07-05 Digitization is accelerating globalization tenfold Social networks have gone mobile telephone television and towns have gone smart How did China manage to create clones of Google Facebook and YouTube and build its own censored version of the Internet How do Arab countries use social networks for their revolutions Why is there no minister for communications in the US and why does no one regulate the Internet there From Silicon Valley to Tokyo from South Africa to southern India and all the way to Cuba and Gaza this unprecedented investigation in the field covers the whole battle of the Internet and its future Drawing on hundreds of interviews in about fifty countries Frederic Martel examines the different Internets on five continents In so doing he reveals that we are moving not only into a connected globalized world but also a territorialized one Smart shows that the Internet has never been truly global and that it will become increasingly local
