Daniels, Elaine Daniels, 2013-09-19 Your fast track to student engagement Everywhere Smokey Daniels goes every school he visits every workshop he leads every keynote he gives there s one teaching strategy that teachers embrace above all others That single method for transforming students from passive spectators into active learners for evoking curiosity inspiring critical thinking and building powerful writers along the way Now with Elaine Daniels as Smokey s coauthor that best kept teaching secret is revealed to teachers at large Written Conversations Just what make Written Conversations so potent An ongoing thoughtful correspondence between students and between students and their teachers Written Conversations above all else catch and ride the wave of social interaction which in turn makes school matter to kids It s that simple Structure by structure from beginning to end Smokey and Elaine describe four variations of these silent writing to learn discussions during which all students in a classroom think and talk at once in writing instead of one at a time out loud How Written Conversations Work It all starts with mini memos short student letters that teachers use to introduce extend and assess class

work Then come dialogue journals where pairs dive deeply into academic subjects Next groups of three or four students join in extended written discussions called write arounds Finally kids take their thinking online where they enjoy digital discussions with partners from their own classroom and with kids from around the world all the while you are supported by detailed descriptions of each structure lessons and annotated student samples making this the most practical teaching book in recent memory What kid wouldn't want to refine written argument skills clarify a point or defend another's viewpoint when the audience is people who matter And Yes Written Conversations align with the Common Core Standards for writing reading language and speaking and listening taking students well beyond the standards themselves Expect More: Children Can Do Remarkable Things Anne Grall Reichel, Ed.D., 2010-09-22 This book encourages teachers parents grandparents and volunteers who work with children to expect more It focuses on the skills children will need to compete in a highly competitive global economy From systems thinking to interpreting complex visual images to integrative thinking our children need a whole new skill set For too long science and social studies have been moved to the back burner Ironically these subjects hold great interest and opportunity to investigate concepts in depth We need to bring them to center stage Throughout the book the author provides many concrete examples of ways for teachers and parents to engage children in meaningful conversation and problem solving Somewhere along the way we seem to have stopped challenging children and started enabling them instead Perhaps this is through no fault of our own As teachers and parents we genuinely care about children We feel for them when they are sick when they are bullied or when they are struggling Quite simply it is our nature to protect With the best of intentions we tend to try and eliminate the struggle But the struggle is essential to growth and a personal sense of accomplishment As children work their way through challenges they build the confidence and habits of mind needed to embrace the next challenge that comes along This book is an invitation to adults to expect more of themselves and of the children they care about The invitation is yours to accept Developmentally Appropriate Curriculum and Instruction Ana Garcia-Nevarez, Kimberly A.
