relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in eleven countries including Germany Italy United States Chile Japan Bangladesh Spain and Australia and designed by such notable architects as Tadao Ando Herzog de Meuron Kengo Kuma Olson Kundig and Peter Zumthor Although similarities do exist between the projects their distinctly different characteristics location and climate context size program construction methods and range of interpretations of tectonic expression provide the most significant lessons of the book helping you to understand tectonic theory Written in clear accessible language these investigations examine the poetic creation of architecture showing you lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office The Changing Shape of Practice Michael U. Hensel, Fredrik Nilsson, 2016-04-14 Architectural practices worldwide have to deal with increasingly complex design requirements How do practices acquire the ability to do so The Changing Shape of Practice provides a handbook of examples for practices that wish to integrate more research into their work and a reference book for students that seek to prepare themselves for the changing shape of practice in architecture It addresses the increasing integration of research undertaken in architectural practices of different sizes ranging from small to very large practices from the UK USA Europe and Asia The book is organized according to the size of the practices which is significant in that it addresses the different structures and resourcing requirements that are enabled by specific practice sizes as this determines and constrains the type scope and modes of research available to a given practice The practices covered include Woods Bagot Perkins Will White AECOM UN Studio Shop Architects PLP Architecture Kieran Timberlake 3XN ONL AZPML Thomas Herzog Partners Herreros Arquitectos Spacescape OCEAN Design Research Association By taking stock of the current shape of practice the book provides essential information for professional architects who are integrating research into their Aluminium Michael Stacey, 2023-11-15 Are you making the most of aluminium Aluminium is one of the most practice flexible and durable materials to design with With exceptional strength durability and affordability it provides us with more than simply the ability to select products When understood properly aluminium becomes something to design with In a world where over half humankind now lives in cities there is a need to design zero carbon attractive and durable architecture This can only be achieved if we are more resourceful if we achieve more with less by understanding materials well using finite element analysis and computer aided design Aluminium can be part of that route to affordable and durable architecture Recycling aluminium takes only 5% of the energy required to produce primary aluminium and it can be recycled almost infinitely without any loss of properties Combining an inspirational overview of the use of aluminium in architecture and infrastructure with a technical level of detail this book shows how useful and versatile aluminium is and how architects can

actually design with it This book provides access to state of the art research into the best practice in application of aluminium to architecture from curtain walling and cladding roofing to structural considerations It demonstrates the material s design flexibility and how it works well with other materials Each process will be accompanied by exemplar case studies that demonstrate the potential and application Woven into the structure of the book are the primary benefits of aluminium its flexibility its durability its sustainable properties and its cost effectiveness Whether you re a first year student or a seasoned designer or engineer this book provides an accessible and deep dive into the uses and benefits of aluminium Design Leadership Ken Sanders, 2022-06-09 Voices of Design Leadership Provides inspiration to architecture and design students and professionals through the insights stories and projects of successful design leaders Voices of Design Leadership seeks to educate inform and inspire a new generation of diverse design leaders. The work includes sixteen profiles of design leaders in architecture interior design planning and research many of whom are leaders at firms that have earned the AIA s national Architecture Firm Award The stories and projects from their own professional journeys illustrate multiple paths to design leadership success Individually each person stands on their own as an inspiring and influential design leader Collectively they express what design leadership can and should look like Representing a broad diversity of expertise and demographics including nine women seven people of color and five first generation immigrants they bring a variety of life experiences and cultural backgrounds to their award winning work Sample topics discussed in the work include The power of diversity Finding and developing design talent Design philosophy and research investments Coaching mentoring team collaboration and community engagement Advice for emerging design leaders Students of architecture engineering construction and real estate will find value and inspiration from Voices of Design Leadership and gain insight into the thought processes of established leaders in their fields The work also appeals to young and mid career professionals clients and educators exploring the next steps of their own career journeys Interdisciplinary Design Thinking in Architecture Education Julie Kim, 2023-12-08 This book explores the creative potential for architecture curricula to integrate solid interdisciplinary thinking in design studio education Annotated case studies both from academic institutions and from professional practices provide examples of interdisciplinary engagement in creative design work highlighting the challenges and opportunities of this approach Cases are from a diverse selection of international collaborators featuring projects from the United States Australia Mexico Germany and Italy and cover a range of project types and scales Chapters by invited experts offer speculations on current and future models situating examples within the broader context and encouraging dialogue between practice and pedagogy The collection of voices in this book offers critical and provocative lenses learning from history while forging inventive and creative roles for the architect as practitioner entrepreneur strategist choreographer activist facilitator leader and teacher Interdisciplinary Design Thinking provides insights into the potential of interdisciplinary engagement at the level of foundational undergraduate education making it ideal for faculty in architecture

schools It will also be of interest to design professionals concerned with interdisciplinary collaboration and how to incorporate similar efforts in their own practices
