Killing Thinking Death Of The University Mary Evans:

Killing Thinking Mary Evans, 2005-09-01 The more it costs the less it's worth Student slogan London 2003 We are told that this world represents our best hope for intellectual vitality and creativity We are also told that we should pay more to enter it and experience its rich resources Yet those rich resources are increasingly marginalized by cultures of assessment and regulation the heavy costs of which both financial and intellectual are to be carried by students Increasingly students are being asked to pay for the costs of the regulation of higher education rather than education itself Access to Higher Education has become more widely available the implications of that change are the concern of this book Mary Evans **The**

Thinking University Expanded Yusef Waghid, Nuraan Davids, 2019-11-27 The Thinking University Expanded considers how the university can be extended and developed to an institution of play that becomes a gateway to new compositions and enactments of opportunities and happiness for university academics and students alike A university of and in continuous play can shape the public sphere in ways that reimagine both the epistemological and political and the metaphysical and the ethical Without abandoning the university's emphasis on thinking the book examines the prospects of opening the university to a new possible use The singular outcomes based lens of seeing higher education distorts the humane and ethical nuance of what a university can potentially do and aspire towards For this reason the book intends to find a new use for the idea of a university one that is responsible and responsive in both its pursuit of the truth and being open to different kinds of truth as made manifest in diverse contexts and life worlds This book will be of great interest for academics researchers and postgraduate students in the field of higher education Reclaiming Feminism Miriam E. David, 2016-06-15 Since second

wave feminism of the 1970s women's rights and opportunities in education and employment have increased across the globe but has equality whether social political or legal really been achieved In this fascinating book Miriam E David a well known and influential feminist in higher education celebrates the achievements of international feminists as activists and scholars She provides a critique of the expansion of global higher education masking their pioneering zeal and zest for knowledge Looking at the changing zeitgeist David contends that feminism has yet to have an enduring influence despite how generations of women have felt empowered She illustrates the power of patriarchal social relations and how everyday sexism or misogyny is keenly felt This impassioned book asks whether a feminist friendly future is possible or indeed desirable

Language Regimes in Transformation Florian Coulmas, 2008-08-22 Globalization has many faces One of them is the transformation of language regimes This book provides an in depth account of how two second tier languages Japanese and German are affected by this process In the international arena they no longer compete with English but their status in their home countries and as foreign languages in third countries is in flux Original empirical and theoretical contributions are presented in this up to date study of language regime change The desirability of a single all purpose language for all communication needs is seldom questioned It is simply taken for granted in many advanced countries such as Japan and the

German speaking countries However it is not clear whether German and Japanese can sustain their full functional potential if their own speakers use these languages in certain domains with decreasing frequency The advantages of borderless communication in a single language on one hand and maintaining highly cultivated all purpose languages on the other are obvious The question of whether and how these two principles can be reconciled in the age of globalization is not In this book leading scholars present their answers Ulrich Ammon Tessa Carroll Nanette Gottlieb Patrick Heinrich Takao Katsuragi John Maher Kiyoshi Hara Elmar Holenstein Konrad Ehlich Fumio Inoue and Florian Coulmas

Local Citizenship in the Global Arena Sally Findlow,2016-11-03 Local Citizenship in the Global Arena proposes a reconsideration of both citizenship and citizenship education moving away equally from prevailing global citizenship and fundamental British values approaches towards a curriculum for education that is essentially about creating cosmopolitan included and inclusive politically engaged citizens of communities local national and global Viewing education as both problem and solution Findlow argues that today s climate of rapid and unpredictable geopolitical and cultural re scoping requires an approach to citizenship education that both reflects and shapes society paying attention to relationships between the local and global aspects of political voice equality and community Drawing on a range of international examples she explores the importance and possibilities of a form of education that instead of promoting divisive competition educates about citizenship in its various forms and encourages the sorts of open and radical thinking that can help young people cross ideological and physical borders and use their voice in line with their own and others real long term interests Successive chapters develop this argument by critically examining the key elements of citizenship discourses through the interrelated lenses of geopolitical change nationalism the competition fetish critical pedagogy multiculturalism protest politics feminism and ecology and highlighting ways in which the situationally diverse lived realities of citizenship have been mediated by different forms of education The book draws attention to how we think of education s place in a world of combined

globalisation localism anti state revolt and xenophobia It will be of key interest to academics researchers and postgraduate students in the fields of education political science philosophy sociology social policy cultural studies and anthropology

Critical Pedagogy Peter McLaren, Joe L. Kincheloe, 2007 Our educational system is in turmoil Many would argue that it has been assaulted and oversimplified by the right There is growing concern that we are becoming a liberal nation state with an increasingly anti liberal population and an electorate that is disinterested in politics In this globalized world the power of capital is so great that opposition to it is often discouraged and disheartened leaving many citizens few political precepts by which to consider their institutions This contemporary failure of vision has opened the way for the unimpeded return of the philosophy of the free market As a result social and educational policies are debated almost solely in terms of how they fit with the needs of the market Social and ethical understandings are replaced by a failed economic theory that requires a radical constraint of our political and economic choices Compassion for the poor the market lets us know is wrong headed because any interference with the labor market will always result in unfortunate economic and social consequences Moral issues are eclipsed by market needs In Critical Pedagogy Where Are We Now the contributors discuss how the field of critical pedagogy should respond to such dire conditions in a way that is theoretically savvy and visionary while concurrently contributing to the struggle to improve the lives of those most hurt by them Critical Pedagogy is essential reading for every classroom teacher and pre service teacher It is also a valuable tool for use in undergraduate and graduate level classrooms

Solitudes of the Workplace Elvi Whittaker, 2015-12-01 Solitudes of the Workplace focuses on experiences of marginalization uncertainty and segregation created by the hierarchical structures of categories in universities and by gendered identities Studying a wider range of women's roles in universities than prior research the experiences of support staff senior administrators researchers non academic administrators and contract teachers are added to those of faculty and students The essays show how attempts to introduce new knowledge are manoeuvred and the resistance this process can encounter as well as the ways in which institutional policies can blur and change identities Addressing longstanding issues such as the entanglement of gender and the assessment of merit attention is also given to how new identities are claimed and successfully projected Essays presenting workers points of view reveal the confusion that occurs when official policy and everyday knowledge conflict when processes like tenure and other status changes create troublesome realities and when it becomes routine to experience status denigration Within the social order of the university and its existing boundaries gender issues of past decades sometimes surface but all too often remain an unspoken presence Solitudes of the Workplace is a revealing look at the isolating experiences and inequities inherent in these institutional environments Privatising the Public University Margaret Thornton, 2011-09-12 Privatising the Public University The Case of Law is the first full length critical study examining the impact of the dramatic reforms that have swept through universities over the last two decades

Feminism, Gender and Universities Miriam E. David, 2016-04-15 Feminism Gender and Universities demonstrates the

positive and robust impacts that feminism has had on higher education through the eyes and in the words of the participants in changing political and social processes Drawing on the collective biography of leading feminist scholars from around the world and current evidence relating to gender equality in education this book employs methods including biographies life histories and narratives to show how the feminist project to transform women s lives in the direction of gender and social equality became an educational and pedagogical one Through careful attention to the ways in which feminism has transformed feminist academic women s lives the author explores the importance of education in changing socio political contexts raising questions about further changes that are necessary Delving into the deeper and more hidden echelons of education the book examines the contested nature of current managerial or business approaches to university and education revealing these to be incompatible with feminist thought A plea for more careful attention to education and the ways in which the processes of knowledge making influence and are influenced by gender and sexual relations *Feminism Gender and Universities* will appeal to scholars across the social sciences with interests in gender pedagogy and modern academic life

Development, Neoliberalism, and Islamism in South Asia Mustahid M. Husain,2022-07-21 This monograph analyzes development through an examination of those class relations and how they are situated vis vis the politics of development and economic globalization in Bangladesh and how they shape aid delivery mechanisms and aid recipients choices in participating in such program One of the main findings is that development in Bangladesh relies on dual hegemony which he articulates as an alliance between the new Bangladeshi political and economic elite and the Western international aid development industry He argues that dual hegemony functions in such a way that it erodes the Bangladeshi middle class and reinforces class and caste differences through the privatization of the public sector and greater fragmentation of civil society This book is of interest to scholars of political Islam international politics and security studies including terrorism and the politics of South Asia

Agitation with a Smile Stephen Bird,Adam Silver,Joshua C. Yesnowitz,2015-11-17 *Agitation with a Smile* offers a reappraisal of Howard Zinn s political thought and situates his efforts in a contemporary context looking toward the nature of activism and dissent in the future This is the first book to provide a substantive account and assessment of Zinn s philosophy and approach to collective action and to a larger extent democracy The contributors to this book explore the most effective mechanisms by which to arouse public support for seemingly radical positions and how current technological advancements may alter our perception of Zinn s activism The book is a valuable guide to a new generation of activists and scholars of politics in gauging the lasting relevance and legacy of Zinn s ideals concepts and methodology The text is neither fawning nor unduly critical unlike many discussions of Zinn in

popular culture Rather the contributors engage the various complexities and tensions present throughout Zinn's work and subject them to contemporary assessment This is a multidisciplinary and international approach to Howard Zinn's intellectual and activist canon

Through A Glass Darkly Margaret Thornton, 2015-11-08 This collection of essays arose from a workshop held in Canberra in 2013 under the auspices of the Academy of Social Sciences in Australia to consider the impact of the encroachment of the market on public universities While the UK tripled fees in 2013 and determined that the teaching of the social sciences and the humanities would no longer be publicly funded it was feared that Australia would go further and deregulate fees altogether In the best tradition of the social sciences the contributors have assumed the role of critic and conscience of society to present penetrating analyses of the ramifications of the corporatisation of the university as neoliberalism continues to occupy the ascendant position in the political firmament The dramatis personae in these analyses are students academics managers and political mandarins with the gendered character of corporatisation an important sub theme

Gender Studies and the New Academic Governance Heike Kahlert, 2017-12-04 What is happening to gender studies and gender research as emerging but contested fields of scientific knowledge in the conditions of the new academic governance And which role do gender studies and gender research play in the current transformations in academia All articles in this book make clear that the impacts of the new academic governance have global glocal and local dimensions which have to be taken into account in analysing the state of gender studies and gender research at the end of the 2010s From diverse geopolitical and sociocultural views the authors simultaneously draw a multifaceted picture of the current situation criticise the widespread tendencies of the marketisation of scientific knowledge suggest strategies for resistance against the neo liberalisation of higher education and research and identify starting points for further and optionally comparative studies on these issues These contributions emphasise not only the need for more theoretical reflection and empirical research and for critical exchanges on the current transformations but also the need for political action to challenge resist and change them The Editor Dr Heike Kahlert is Professor and Chair of Sociology Social Inequality and Gender at the Ruhr University Bochum RUB Germany
