The volume considers the changing visual material and spatial character methodological challenges posed by and formal political and historiographical significance of a wide range of British European and North American case studies since the eighteenth century. The volume's eleven case studies allow the reader to understand connecting notions behind the formation of interiors and fashionable clothing. The essays combine a wide range of significant and challenging new examples alongside powerful revisionary analyses of the various periods artists designers and their best and significant objects.

**Fashion Interior Design and the Contours of Modern Identity** is concerned not only with fabric but also with the body and the implications of embodiment in the practices of both design domains which are equally invested in the comfort aesthetic pleasure extension and support of the body in different and yet seemingly identical ways.
