POINT OF TAPING:

EFFECTS OF TAPING:

The foot will be supported and gradually with weight, however, a change in posture is necessary for full recovery. Some shoes where the toes can move freely or stay together often when possible.

1. Measure and cut tape. Spread the ends. Place the tape on the side of the foot.
2. Extend the upper tape around the foot along the outer side of the foot. Extend the lower tape parallel to the first, wrapping downward around the base of the big toe.
3. Place the base of the thumb 'X' cut across the base of the big toe.
4. Extend the upper side of the tape around the front of the arch.
5. Extend the lower side of the 'X' cut across the base to end just before the heel.
